

THIRTIETH YEAR

LANCASTER, KY., THURSDAY AFTERNOON, JULY 10, 1919.

NUMBER 15.

**RECORD BREAK-
ING SALE.****Robinson Farm Brings
Over \$300. an Acre.**

While not a large crowd attended the Curt Robinson farm sale yesterday, everyone on hand seemed to get in the bidding, which became lively before the close of the sale. The farm was sold at an average of \$302.35 an acre, a record breaker for Garrard county for this size farm, selling at public auction.

The sale was conducted by the United Realty Company, of which Mr. Oliver T. Wallace is manager. He was assisted locally by Mr. D. A. Thomas, of the Thomas Realty Company.

Mr. Wallace was disappointed in not getting his auctioneer, but the public was not, for it found in Mr. Wallace, one of the best auctioneers who has taken the block recently and proved an adept in this line.

The farm was sold in six tracts and the following is a list of the purchasers: Mr. G. C. Walker bought the home and twelve acres for \$10,150; Riley Ison one tract 28 acres, \$300; an acre and a 20 acre tract for \$250 an acre; Odus Naylor 40 acres at \$272.50; Dit Huffman 45 acres at \$240 an acre; Luke Sherrow one tract of 27 acres for \$252.50 and one tract to Courtney Roberts for \$315; bringing the average for the 180 acres up to \$302.25.

AERO CLUB**To Be Organized To-
morrow Night.**

Last Monday night a number of citizens of the town met at the court house and tentatively organized an Aero Club, every one present expressing a desire to become a member. The object of the organization is to look after the permanent Aviation Landing Field, that has been established here and that will mean so much to the town and county. Major Echols who was here last Sunday, informs us that Lancaster is ideally and geographically located for a permanent landing field and when all the details are completed will be used as a base by the government from Camp Knox, to visit points in Central Kentucky. He says an aero photo will be taken of the town and park which alone makes it unusual as no other town in Kentucky has the Park layed off in a Maltese cross, which is so similar to the cross used in landing fields to guide the aviator. This photo when completed will be used in an aero map of Kentucky and sent to aviators all over the United States.

Membership committees were named last Monday night and are meeting with the cooperation of the public, all feeling that the landing field here will be a great boost for the town and county.

Another meeting is called for tomorrow, Friday night at the court house, when a permanent organization will be formed and officers elected.

Come to this meeting and don't turn a deaf ear to a proposition that will mean so much to Lancaster and Garrard county.

Baptist Church.

Last Sunday this church gave \$153 to the Kentucky Baptists' Orphans Home. This is a splendid offering to a worthy cause and we may justly pride ourselves on our offering.

Come worship with us Sunday.

Sunday School 10 o'clock A. M.—Subject, "Baptism".

Preaching 11 A. M. by the pastor. Subject—"How Shall We Escape?"

A few items of very important business to be transacted.

Services will positively be concluded at twelve o'clock.

C. D. Strother, pastor.

Ball Game.

Paint Lick will cross bats with the Berea team next Saturday on the former grounds and the game will be called promptly at 3 o'clock.

This will be a game worth going many miles to see and we predict a great crowd as each team will have boosters and friends on hand to see one of the best games of the season. Paint Lick has won many games this season and seems almost invincible, but Berea claims she will take their measure next Saturday, so the public may be prepared for a contest that will be interesting.

Regular meeting of the W. C. T. U. Saturday at the Club room at 3 o'clock.

CLOSE CALL**W. N. Brown Goes Over
Bank Near where two
Ministers Were
Killed.**

Last Tuesday afternoon Mr. W. N. Brown, of Harrodsburg, had a very narrow escape from serious injury or death. With Mrs. Brown he was returning from Lancaster and when their car reached the point in the road near the bridge where Rev. Clyde Shelton, of Salvisa, and Rev. Elbridge of Paint Lick, were hurled over an embankment and killed a short time ago, Mr. Brown stopped the car to look about the place and show the various points to his wife. When he attempted to start the machine he had difficulty getting it off up the hill, and thought if he would back a little he could make the grade more readily. Mrs. Brown got out to direct her husband in the lay of the road, and in the effort to get the machine going it backed off of an embankment near where the car of the two ministers had been hurled. The machine landed on the rear part and the engine pointed straight up, but by some miracle Mr. Brown escaped without injury. They secured another car and went on to Harrodsburg that night and the next morning Mr. Brown sent a truck and tackle to the spot to pull the machine back to the road and take it home.

Community Nurse Here.

Miss Margaret Frost, who has been appointed the community nurse for Garrard county has arrived and has engaged rooms at the Kensington hotel.

Buys "Lexington".

Mr. W. J. Romans is one of the latest purchasers of that handsome and popular car known as the Lexington, demonstrated by Mr. M. D. Johnson, who has the exclusive agency for five counties. It is considered one of the best cars on the market and every owner is a booster for it.

Colored Boys Return.

Several of our worthy colored boys have recently been mustered out of the service and have returned home after a year or more spent on or near the battle front. Among those returning this week were: John Burton, Lige Robinson, Billy McCoy, Eddie Thomas, George Denny, Charlie Leavell and Price Logan.

War Relics.

Mr. Asie Barnett, who is in the service overseas, and is a son of Mr. and Mrs. C. C. Barnett of this county, sent to his parents an interesting group of war relics, which the public is cordially invited to inspect in the window of the Record office.

Some of the relics were loaned by our colored friend, John Burton, who has just returned and is reciting some exciting experiences he had while at the front.

Untagged Dogs Killed.

Since January 1st, Sheriffs in seventy-six counties of Kentucky have killed 4,600 dogs, of which 4,394 were unlicensed and 206 outlaws bearing license tags. Henderson county hiled the record of 344 killed, and Union next with a score of 275. Trigg county impounded 379 unlicensed dogs but slew only eighty-three of them. Lee, Lyon, Livingston, Pulaski and Rockcastle counties neither impounded nor killed any. The record under the dog license shows 3,648 unlicensed dogs impounded and 4,394 killed, 140 licensed dogs impounded and 206 killed. Thirty-nine counties have not reported.

Architect Here.

Mr. Fred Manley, chief architect for the Garrard Tobacco Warehouse was in the city yesterday inspecting the work of the building which is going up rapidly. When asked what he thought of the building, he said, "there won't be a better one in the State of Kentucky." "I have planned over a hundred and this will be when completed the most up-to-date one that has ever come under my observation."

In speaking of the cost of the building, he said, "the material that was purchased for the sheathing for the building can be sold today for a handsome profit and the tar and gravel roof, that was contracted for \$4.75 a square is the greatest bargain I have ever known." "I contracted for the same roofing for another warehouse that cost the firm \$7.50 a square."

JAIL TAX DODGERS**Raper Refuses \$1,500,-
000 Offered By Bos-
ton Wool Merchant
To Escape.**

Tax dodgers, rich and poor, were promised the full limit of the law by Commissioner of Internal Revenue Raper in a statement commenting on the recent conviction in Boston of William A. English and John H. O'Brien, wool merchants who returned their taxes at \$101,000 instead of \$1,379,811.

"It is our determined policy," Mr. Raper said, "that wealth shall not influence to prevent willful tax dodgers from going to jail. The big and financially able must be treated in the same way as the small wilful violators and hence compromises through money will be rejected."

Mr. Raper said the government refused to allow English and O'Brien to pay \$1,500,000 to escape prison sentences. Civil proceedings will be begun immediately by the government to collect the tax due from them, and the additional penalty.

AERIAL MOVIE**To be Shown Next Tues-
day Night.**

An Aerial movie picture will be shown at the Roman's Opera House next Tuesday night, under the direction of the recruiting officers for the aviation branch of the United States army now stationed here.

This is said to be a wonderful picture, taken in action and shows the position of the planes when in battle formation. Don't miss it.

**Buckeye High School
Opens July the 14th.**

We are glad to announce that the Buckeye Consolidated High School opens its first session the 14th of this month. The prospects are bright and we are expecting its first year to be highly successful. This community has the reputation of being the best in the county. The school building is large, modern and beautiful. We feel that the community has done its part and now it is left to the teachers to do theirs. And this we shall strive to do.

And may we ask that every lover of Buckeye will cooperate with us in every way possible to bring the best educational advantages possible to the boys and girls of this community. Sincerely,

Caskey Temerlin, Principal,
Zula Calico and Inez Ray, teachers.

**Ball Game Goes
To Paint Lick.**

Burgin, Ky, July 4th.
The Paint Lick Blues defeated the locals today by the score of 6 to 2, before possibly the largest crowd that ever witnessed a ball game in Burgin, the crowd being estimated at two thousand people.

Promptly at 3 o'clock the two ball clubs stepped out on the greensward of Burgin ball field, and by good batting and base running the visitors piled up 3 runs in the first half. Tatums pitching and G. Duersons batting had a lot to do with taming the Burginites, but generally the Paint Lick team played just a shade the best ball and wasn't out of luck either.

These teams will meet at an early date at Paint Lick, to settle their differences. WATCH for the date, as you will be sure of a good game of ball. Don't miss it.

Returns Home.

It is gratifying news to everyone to learn that Mr. T. L. Yantis has returned to his home after a successful operation at the St. Joseph Infirmary at Lexington several weeks ago. No more popular man or better citizen lives in Garrard than Mr. Yantis and all his friends wish for him renewed health and vigor for many years to come.

Public Speaking

Hon. King Swope will address the citizens of Lancaster and Garrard county, at Court House in Lancaster, Saturday July 12th at 2 o'clock. Ladies and soldiers invited.

3-2t.

Swat That Fly.

El Vampiro powder will do the work while you sleep. 10 cents a box. Storms Drug Store. 6-26-3t.

GREAT MYSTERY**Surrounds Robbery Of
Patterson Residence
Last Friday After-
noon.**

Great excitement prevailed over the city last Friday afternoon when it became known that the residence of Mr. and Mrs. G. M. Patterson had been entered by thieves and about \$1,000 in money and checks stolen. The robbery occurred between the hours of four and six thirty o'clock and while the family were out for an auto drive, the house being unoccupied at the time.

Returning from the depot with the express and freight receipts of the day in a large tin box, about four o'clock in the afternoon, Mr. Patterson, who is our local express and L and N agent, deposited the box and contents under the sofa of his parlor, where he thought it would be safe from all intruders, and together with his family went out for a drive returning about six thirty or two and a half hours later. Upon entering the home they were shocked to learn that the house was torn "topsy turvy" and an immediate investigation showed that the house had been entered and the contents of the box stolen. Further investigation showed that the thief had entered the rear door, cutting the screen, unhooking it, and then breaking the glass from the transom, climbed over the top and unlocked the kitchen door, this being accomplished, the thief had access to the entire house, and lost no time in finding the box, which he evidently knew had been left there by Mr. Patterson only an hour before.

Blood hounds were summoned from Lexington, but did not arrive until nearly ten o'clock, some six hours after the theft. Owing to the oil on the streets, the dogs were unable to strike the trail and no arrests have been made, although we are informed that one or two are under suspicion and warrants for their arrest may be made soon.

The loss is a heavy one and but for the banks being closed on July 4th, the money would have been deposited. The public is worked to a high pitch and some startling developments may be brought out in the next few days.

The loss is a heavy one and but for the banks being closed on July 4th, the money would have been deposited. The public is worked to a high pitch and some startling developments may be brought out in the next few days.

**Dempsey Wins In
Three Rounds.**

William Harrison Dempsey is the new heavyweight boxing champion of the world. He acquired his title by whipping Jess Willard in three rounds. The fight was a brutal one, little science being used except in the first part of the first round. The men simply stood toe to toe and slugged. At the end of the third round Willard was dazed from the beating he had taken and bloody, bruised and one eye closed, his seconds threw up the sponge.

**Newman Gains
In Garrard.**

Friends of Senator John W. Newman candidate for the Democratic nomination for Commissioner of Agriculture, are looking well after his fences in Garrard and as a result has gained much ground here during the past few weeks.

One reason for this is the fact that he is closely related by marriage to the Rose's, his wife being an own cousin to Dr. B. C. Rose and Mr. R. L. Rose and Mrs. Green Bowling, all prominently connected and rank among our most popular and substantial citizens.

110 ACRES

Garrard County land, gently rolling limestone land, long frontage on main pike. Excellent building sites; right at village, bank, churches, graded schools, and will cut to suit purchasers. This is your opportunity to locate where these advantages are to be had. You can buy this for homes or investments.

D. A. Thomas Realty Agency.

A Chance To Fly.

Any man or woman getting as many as three recruits will be given a ride over the city of Lancaster. Ages of the recruits to be between 13 and 35 years. The recruit will also be given a ride just as soon as possible after reporting to camp.

If he can pass the physical tests required to become a crew chief he may have the privilege to learn to fly himself.

Enlistment time 1 or 3 years. Lieut. Taylor

COUNTY**HISTORIAN.****"Billy" Miller Named
To Succeed Mrs. Her-
ring.**

A few weeks ago Mrs. Fisher Herring sent in her resignation to the Kentucky Council of Defense as County Historian for Garrard county, owing to the pressing duties of her household.

Sergeant Billy Miller has just been appointed and received his commission last Sunday. The appointment of Mr. Miller is a popular one and with the co-operation of the people of Garrard county, he should and will secure a complete record of every boy who enlisted from Garrard during the European war. But without this co-operation and assistance, little can be accomplished. Mr. Miller wants the name of every soldier who volunteered his services and a complete list of Garrard county's killed and wounded, including those who died of disease.

The list of the wounded and dead were published in the Central Record several weeks ago and since that time some names have been sent in of boys who died in the service, whose enlistment had never been recorded. Not a name should be omitted and the public and every soldier is asked to aid the County Historian in making Garrard county's record complete.

FIRST AIRSHIP**Crosses Atlantic After
Four Days Voyage.**

Nearly exhausted from the more than four days on their dangerous voyage across the Atlantic, the crew of the R-34, the first lighter-than-air safely at Roosevelt Field, Mineola, machine to fly across the ocean, landed the huge British airship covered 3,600 miles in 108 hours and 12 minutes through high winds and terrific electrical storms. When she landed the craft carried only enough fuel to keep her in the air ninety minutes more. Five hundred sailors helped to bring the great gas bag to anchor, and they will stand by the dirigible through the night to watch her. The return voyage will be started in a short time.

DEPOT STREET**Enjoying Build-
ing Boom.**

Depot street has made wonderful strides within the last month in the building line. A. H. Bastin and Company will have completed in a few days a large modern store room, to be occupied by A. T. Scott and Son as a grocery and general merchandise store. Watch for his advertisements which will appear in this paper. Mr. Scott is a merchant of the highest type and is going to make some of his competitors sit up and take notice. He tells us he knows that "it pays to advertise" and proposes to tell the people of his bargains through the columns of this paper. Mr. Scott is also going to do something else that none of the other merchants have done during the past year or more, that will endear him to the buying public. But what we started out to tell was the buildings now in course of erection on this thoroughfare.

The S. S. S. Lumber Company have just completed a large ware room that will be a model of convenience and now Lancaster can boast of two of the best lumber yards in Central Kentucky.

Old buildings that have been an "eye sore" along this street for many years have been torn down and the lots prepared for other buildings which will go up in the near future.

Just a little further out this street house is assuming large proportions the handsome Garrard Tobacco Warehouse and when completed will add materially to the value of all property along this street.

Col. Carman Returns.

Friends in Lancaster were very much disappointed in not seeing Col. Carman, who made a two days visit to his old home in Paint Lick this week. In conversation with him over the phone he informs us that he is in the best of health and will be relieved from service about the last of August. He is now stationed at Camp Dix, N. J., and left for that place this morning.

AEROPLANE**ARRIVES.****Aviation Headquarters
Established Here.**

Recruiting Campaign Opened And All Central Kentucky Towns To Be Visited.

SATURDAY TO BE A BIG DAY.

Everything will be up in the air around Lancaster for the next few weeks, as the United States Government has established its recruiting headquarters here and from this point all Central Kentucky towns will be visited during the next few weeks.

Lieutenant Elmer L. Taylor, an aviator of experience and a perfect gentleman beside, is in charge of the recruiting crew, they having arrived from Camp Knox last Tuesday afternoon, and are now pleasantly camped on the College grounds just in the rear of the school building. There is a complement of eight men in the crew, three large trucks, one a tank truck carrying gasoline for the aeroplanes and high grade oils such as used in the aviation service.

Lieutenant Taylor tells us that a tent will be erected just in front and near the college building where all who are interested in this branch of the service will be shown, the Marlin machine gun, timed to shoot through the propeller of the ship, while making many thousands of revolutions a minute; also the Lewis gun and its mounting; this gun being used by the observer in the rear lock pit; also the ammunition used in these guns, photo machine guns for getting the range and aim, used in training cadets. He also has on exhibit, the "L" type camera used at an altitude of 4,000 to 6,000 feet, for map work or mosaics.

You will also be shown the Aero Oblique camera, for taking pictures of individual buildings, many photo's that are indeed interesting, taken at various altitudes and a sample of the propeller used in all aeroplanes. Some one will be in this tent at all times to answer all questions pertaining to this particular branch of the army service.

A complete Radio set will be on exhibition in this tent. This system of communication is used in sending messages from the plane to the receiving station on the ground.

Lieutenant Skow, who flew over Lancaster during the last Liberty Loan Drive arrived in his aeroplane yesterday and will remain for several weeks. Demonstrating to the public the marvelous and daring feats that can be accomplished with this wonderful machine.

Next Saturday July 12th, one of the greatest public demonstrations ever seen here will be pulled off and a great crowd should turn out to see it.

Many towns in adjoining counties will be visited for a day, during their stay in Lancaster, the truck preceding the aeroplane to show the anti-air craft guns and the guns used on the machines.

The government is going to a great expense in making these exhibitions and is for the purpose of enlisting recruits to join the aviation branch of the service.

Here is what there is in it for the boy who enlists:

All Velvet—The government furnishing clothing, food, medical attention and quarters.

Private, \$30; Private, first class, \$33; Corporal \$36; Sergeant, \$44; Sergeant Aviation Mechanician, \$66; Sergeant, first class, \$51; Sergeant, first class Aviation Mechanician, \$73.50; Master Signal Electrician, \$81; Master Signal Electrician, Aviation Mechanician, \$121.50.

Call at the recruiting station located as stated above and all the information desired will be gladly given you.

The Aeroplane can be seen at the landing field, which has been permanently established, out on the Stanford road on the farm of Mr. A. B. Brown and will be gladly shown anyone. Go out and see it and watch above, for it may fly over you at any minute.

The names of the men here on recruiting duty from Godman Field, Kentucky, are as follows: Lieutenant, Taylor, Elmer E. Lieutenant Show, Charles T. (here with the ship.) Sergeant, Ludewick, Oscar D. Chauffeur, Parks, Arthur L. Cook, Cottrell, James F. Pvt. 1st class Easley, Henry. Private Miller, Glen. Private Smith, Ira J. Private Haney, Carroll, A. Private Campbell, Charles T. Private Schuck, Henry. (the mechanic on the ship.)

JAMES C. WILLSON & CO., 210 S. Fifth, Louisville, Ky.

The Word "Magnet."

The word "magnet" is derived from the name of the city of Magnesia, in Asia Minor, where the properties of the loadstone are said to have been discovered.

The Other Side.

If you want to make yourself solid with other folks don't stop to tell them what wonderful things you have done, but just say, "You fellows have the world beaten for big things!"

BLACK IS A WINNER

It is generally conceded that Governor James D. Black will be an easy winner of the democratic nomination for Governor in the August Primary.

The people are for him. He is the logical candidate. His great service to the ticket in 1915 should not go unrewarded.

He is 10000 votes stronger than any other candidate. In 1915 he reduced the republican majority in 35 counties in Eastern Kentucky, nearly 5000 votes.

His majority over his opponent was from 4000 to 8000 more than the majority of the other members of the ticket over their respective opponents.

He is the best campaigner, the best debator, the most pleasing speaker, by far, of any candidate offering for Governor on the democratic ticket.

In him, Democracy has an invincible champion.

He's a Winner—Vote For Him and Democratic Success in November!

BUCKEYE

Dr. G. M. Hendren is very ill at a hospital in Lexington.

Mrs. Pernelia Bogie spent Friday with Mrs. W. H. Gulley.

Mrs. Mal Carter has been ill but is improving at this writing.

Miss Louri Brown was the guest of Miss Bernas Broadus recently.

Mr and Mrs. A. C Miles were in Nicholasville Sunday for the day.

Mr. and Mrs. Herbert Whittaker and children were in Richmond, Saturday.

Mrs. N. K Bogie of Lancaster visited her daughter Mrs. Jesse Hill recently.

Mrs. Robert Layton spent Monday with her parents, Mr. and Mrs. L. F. Brown.

Mr. and Mrs. G. W. Ray entertained a number of relatives at dinner on Sunday.

Mr. W. H. Gulley and Mr. Charlie Grow were in Richmond on business Monday.

Mr. Elgin Overstreet and Mr. Richard of Akron Ohio visited Mr Thomas Morford recently

Mr. and Mrs. T. C. Jenkins and Miss Margaret Bradshaw spent Sunday with Mr. and Mrs. T O. Hill.

The Ladies Missionary Society will meet on Thursday July 17, all members are urged to be present.

Mrs. Fain and Mrs. Overstreet of Jessamine county were guests Saturday of Mrs. S. N. Morford.

Misses Cinda Bell and Susan Etta Allman of Richmond are spending the week with Miss Barbara Gulley.

Rev. D. F. Sebastian will fill his regular appointment here Saturday afternoon and Sunday morning.

Mr. and Mrs. Forrest Curtis and children, Mr. and Mrs. L. L. Sanders and son visited Mr. and Mrs. Hiram Ray and family.

Please call at my office in the Court House and list your taxable property for this year, as the time is fixed and limited by the Law. **DO NOT PUT THIS OFF.** A. T. SCOTT, Garrard Co. Tax Commissioner.

BROWN.
On Sunday morning at an early

hour the death angels claimed as their victim, Mrs. Marion Brown. She had been in ill health for some time. She was the daughter of Mr. and Mrs. Harrison Ray and several years ago she was married to Mr. Joshua Brown who preceded her to the grave seven years ago. She leaves to mourn her loss a father, mother, one sister one brother and two children, Mrs. Dan Doolin of Bryantsville and Mr. Dan Ray of this place. The deepest sympathy of the community goes out to the loved ones in their hour of trial

PAINT LICK

There was preaching services at New Hope church Saturday evening, also Sunday morning and evening, conducted by Rev. G. L. Herr of Kings Mountain, N. C.

Mr. and Mrs. Jack Davis, L. H. Davis, and Miss Davis were in Berea Monday and Tuesday with their sister, Mrs. John Tudor who is critically ill at the Robinson Hospital.

The many friends of Mrs. John Tudor will regret to learn that she is critically ill at the Robinson Hospital at Berea where she underwent an operation for appendicitis Saturday.

Please call at my office in the Court House and list your taxable property for this year, as the time is fixed and limited by the Law. **DO NOT PUT THIS OFF.** A. T. SCOTT, Garrard Co. Tax Commissioner.

Miss Nora Conn celebrated her eleventh birthday Tuesday by entertaining quite a number of little friends. The hours were from 3 to 5. Games were played. Music also added to the enjoyment of the afternoon. Delicious refreshments were served and all present had a most enjoyable time.

Vox Populi, Vox Dei.

This is a very ancient saying and means "The voice of the people is the voice of God." It can be traced back through Latin to Greek. It is found first in a work on morals, by the Greek poet, Hesiod, who lived about the eighth century before Christ.

Equal to the Occasion.

"Speaking of accommodating hotel managers," said a traveler, "the best I ever met was in a provincial town I reached the hotel late in the evening. Just before I retired I heard a scurrying under the bed, and saw a couple of large rats just escaping. I at once complained at the office. The manager was as serene as a summer breeze. 'T'll fix that all right, sir,' he said. 'Boots! Take a cut to room 12 at once!'"

A Great Man.

A great man is he who chooses the right in invincible resolution, who resists the sorest temptations from within and without, who bears the heaviest burdens cheerfully, who is calmest in storms and most fearless under frowns, whose reliance on truth, on virtue, on God, is most unflinching. I believe this greatness to be most common among the multitude, whose names are never heard.—W. E. Channing.

Daily Thought.

Sermons in stones and good in every thing.—Shakespeare.

Mind That Is Truly Free.

I call that mind free which is jealous of its own freedom, which guards itself from being merged in others which guards its empire over itself as nobler than the empire of the world.—William Ellery Channing.

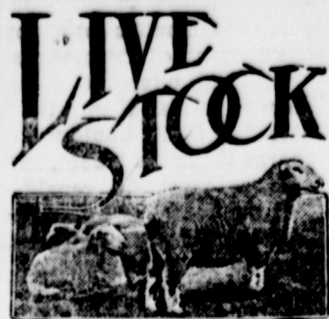

Stranger to Western World.

The Asiatic zoological expedition sent into the South Chinese mountain province of Yunnan to investigate its range of animal life, succeeded in securing several fine specimens of the serow, which is a stranger to the western world. The serow is a mountain dweller, somewhat like the chamois. It is wary and fleet and takes a dizzy and seemingly impossible course among its native crags.

Doomed to Wretchedness.

Let a man choose what condition he will, and let him accumulate around him all the goods and gratifications seemingly calculated to make him happy in it; if that man is left at any time without occupation or amusement, and reflects on what he is, the meager, anguished felicity of his present lot will not bear him up. He will turn necessarily to gloomy anticipation of the future; and unless his occupation calls him out of himself, he is inevitably wretched.—Pascal.

MICKIE SAYS

ORPHANED LAMBS AND PIGS

Patience, Care and Good Nursing Have Brought to Maturity Many Unfortunate Animals.

(Prepared by the United States Department of Agriculture.)

Many weak "orphan" lambs and pigs, requiring too much care for the average farmer or ranchman to bother with, are salvaged by the boys and girls belonging to the clubs organized by the United States department of agriculture and the state colleges. Patience, care and good nursing by a

A Club Boy and His Three Orphans.

Youngster have brought to maturity animals which otherwise would not have survived infancy. As a result, the meat supply is increased and the boy or girl is enabled to earn money. The father of a little girl in Anson county, N. C., who was very anxious to join a pig club, repeatedly refused to give her a pig. One of his pigs did not do well last year and he tried to sell the "runt" for \$1, but could not find a buyer. His wife persuaded him to give the friendless pig to the little girl. Care and careful feeding brought it to maturity. After a while the club member's herd was increased to six. The little girl traded the best two of the litter to her father for sole possession of the mother hog, and sold the other three for \$15. Having now acquired a membership in the pig club, she plans to continue in the work.

CO-OPERATIVE SHIPPING PLAN

Boys of Florida County to Market Their Pigs in Carloads—Engaged in Feed Contest.

(Prepared by the United States Department of Agriculture.)

The pig club boys of Madison county, Fla., are planning to market their pigs next fall in a co-operative carload shipment. These boys are now busily engaged in a feeding contest and are working for one of a number of prizes offered for the most successful feeders. Peanut meal and corn, with rape and rye pastures, make up the present rations of the club pigs. The local county agent has already informed a number of livestock commission companies of the plan of marketing the club pigs, and states that the buyer will have to bid above the market price to get them.

FATTENING ON SELF-FEEDERS

Hogs Fed in This Manner Save Feed and Labor and Are Fit for Market Much Earlier.

(Prepared by the United States Department of Agriculture.)

Fatten hogs on self-feeders as far as possible. Hogs fed in this way save labor, save feed in proportion to the gain in weight made, and are ready for market sooner than those which are hand fed. Less feed is actually required to fatten when hogs are self fed. The system is therefore economical in every respect.

The horses should be given plenty of fresh water regularly every day.

Regular feeding is of paramount importance in keeping stock in a healthy condition.

Pasture lands devoted to sheep have greater possibility of their own sustenance than any other.

The rule is that it is better not to milk the cow before freshening unless it become absolutely necessary.

There is nothing like a self-feeder to give pigs a good start, and it is the start they get that tells in the wind-up.

By providing good pasture crops for lambs after weaning, a set-back in growth may frequently be avoided and the lambs marketed at an earlier age.

207 Acres

OF LAND AT PUBLIC

AUCTION

TUESDAY, JULY 22nd

10 O'CLOCK.

GARRARD COUNTY, KENTUCKY.

On the Hyattsville and Kirksville Pike, 7 miles from Lancaster, 3 miles from Kirksville. This is the farm of Theo Cotton, right on pike, also fronting on County Road. In good neighborhood, splendid school at one corner of the farm. Land is rolling and very fertile. Garrard County sandstone land, the best tobacco land in Kentucky, gives color and quality to tobacco, which has made Garrard County tobacco sell for the highest market price. This farm will be subdivided and sold in 5 separate tracts.

TRACT No. 1.—about 80 acres, with 4 room dwelling, cellar and cistern, 12 acre tobacco barn, 37 acres in corn, 8 acres in tobacco, balance in blue grass, large orchard of young trees.

TRACT No. 2.—about 35 acres, fronting on pike, in rye stubble.

TRACT No. 3.—about 20 acres, fronting on pike 3 acre tobacco barn, wheat stubble sown to timothy and clover.

TRACT No. 4.—About 35 acres, all in blue grass, good tenant house and barn on this tract and fronting on County road.

TRACT No. 5.—About 35 acres, fronting on pike, 4 acres in tobacco, balance in corn.

If you want more than any one tract will sell two or more tracts together so you can get the number of acres you want.

This is an opportunity to buy a farm in a high state of cultivation, very productive, good for investment or as a home.

TERMS EASY, AND THE LAND WILL PAY FOR ITSELF.

POSSESSION—JANUARY 1st, 1920.

THE MAN WHO WANTS LAND TO RENT OUT YOU CAN'T BEAT IT.

Watch my auction sales and see who does the business. Look this land over before sale day and you will surely attend the sale and bid on the land. All I ask is for you to look at it. The quality of the soil speaks for itself. Farm well watered, good cistern at house and everlasting stock water.

SWINEBROAD,

THE REAL ESTATE MAN.

W. E. MOSS, Advertising Manager.

LANCASTER, KY.

Was Last Polish King.

In 1798, on the 11th of April, Stanislaus Poniatowski, the last king of Poland, died. Poniatowski ascended the Polish throne in 1764. The condition of Poland required a strong man on the throne to keep the country from ruin, and Stanislaus lacked the necessary strength and statesmanship to sustain, Prussia and Austria divided this kingdom among them and the deposed king retired to Petrograd on a pension, where he died in 1798.

Optimistic Thought.

Virtue and goodness are confined to no station.

Some Story.

Said the mournful man, "Someday, somebody, somewhere, somehow will get an inspiration and in the fervor of the hour will write a chunk of fiction that doesn't contain the word sordid, doesn't refer to the flotsam and jetsam of life and excludes all persons with hectic flushes."

From Apricot Pits.

California produces yearly about 7,000 tons of apricot pits, and home chemists now obtain \$200 of materials from each ton. The price of the pits, formerly sold in central Europe at \$45 a ton, was reduced two-thirds by the war. The products include a fruit oil substitute for olive oil, the essential oil of apricot (known also as bitter oil of almonds), a cooking meal and a cleansing meal, and American (formerly Prussian) blue.

Lancaster, Ky., July 10, 1919

For Congressman.

We are authorized to announce CHAS. A. HARDIN, of Mercer county, a candidate for Representative in Congress in this, the Eighth Congressional District, subject to the action of the Democratic party.

SOMETHING FOR NOTHING.

We are going to give the idle young men of this community something for nothing—a little advice free of charge. But it is good advice, is given in all sincerity, and is for their present as well as for their prospective good.

You tell us you want work, but there is nothing for you to do.

Let us see.

All over this part of the state there are many of the best farms of the country. There are big farms, medium sized farms, and even one-man arceages.

These farms are not producing to their maximum, because the owners can not secure the necessary farm labor. If they could secure the necessary help, the acreage would be materially increased each year, and the community would become richer, and better, and more attractive to all people.

You want a job, do you? We'll test your sincerity, for your good and the welfare of the community.

To each young man, out of a job, who is willing to go onto a nearby farm and go to work, we will run in this paper, FREE OR CHARGE, a five line want ad for two weeks. That ad should secure you job within a few days.

There is no more dignified calling than that of tilling the soil. It is the source from which the sustenance of all life springs.

Go onto the farm today. Be industrious. Strive each day to learn something new. Make up your mind that you will begin at the bottom and end at the top.

In ten years, while still young, you will be carrying success around in your pocket. You will have a comfortable bank account. You may even have a farm of your own. And you will be admired and respected by the whole community.

BUT—
"No farm life for me", you say?

Then this is our prophesy: In ten years, instead of being successful and admired by your neighbors, you will be still periodically looking for that job. You will be a stranger to the business entrance of a bank. You will be scheming to make both ends meet, possibly at your wits end to support a family on an income not sufficient for one.

The young man who begins life with looking for a soft job generally ends by doing the dirty work which others kick aside.

Two roads are open before you, and no obstacles bar your way. The choice is yours.

SAVING DAYLIGHT.

There is weeping and gnashing of teeth in the large cities at the repeal of the daylight saving law. But they are not narrow minded about it. They admit that the law has been working a hardship to farmers, and that there is plenty of argument in favor of its repeal. If the farmer sets his clock in contradiction to railroad time, his schedule will get considerably twisted when he is shipping cream and produce to the city consumer.

But the whole trouble is so easily cured that it is difficult to understand why it ever became a vexed question. It is simply a matter of phraseology. We can call any time bedtime, if we want to go to bed.

City folks can have what they want without hurting the farmers, if they prefer to start work an hour closer to sunrise. Make employers get together and arrange that offices shall open and close an hour earlier. Places that open at 8:30 and close at 5:30 can open at 7:30 and close at 4:30. They will not work any harder, and they will have more light in the evening all the year round.

IMPORTANT TO COUNTY OFFICIALS.

While political interest will center in the primary election

on August 2, which is four weeks from Saturday, and while the 8th district special election for Congress will be a one-sided affair, the former will be the side show and the latter the main event insofar as this district is concerned.

The Attorney General, in a long opinion, written in answer to a letter from Sheriff Roberts, of this county, and with which opinion Sheriffs, County Clerks and others would wisely familiarize themselves, makes it imperative that the special election in the Eighth Congressional district shall be held in the regular voting places and by the regular election officers—that is, the officers who were appointed last fall, and who are as much in duty bound to perform their duties for the year ending next fall as are any other constitutional county or State officers, and who are, hereafter, to be prosecuted for failure to do so.

The Sheriffs in some of the counties are said to have so far overlooked their duties set forth by the Attorney General, particularly as to the advertising they shall do in each precinct of the county, and in the county papers. These officers, as well as the County Clerks, election commissioners and election officers, would do well to read the Attorney General's opinion.—Shelby Record.

THE MIDDLE CLASS IN OVERALLS.

The Winnipeg strike has proved a rather interesting fact. It has established the truth that if all the organized manual workers in the country decide to strike, they can do it, and the country will get along without them.

In Winnipeg the military and police had a certain amount of work to do, but it consisted of suppressing hoodlums when the mob got too noisy. The purpose of the strike was to prove that the manual workers could not be dispensed with. And the middle class group (if we can speak of such a class in these days) provided that they could.

The middle class group operated the public utility plants, and cleaned the garbage cans. There was no reason why they shouldn't. They were hardly likely to feel any false pride about it, merely because they were brain-workers. Most of them draw lower salaries than the manual workers, anyway.

There is no cryptic mystery about running a street car or a locomotive. Or calclmining a wall. An amateur may not do these things at first with the same dexterity as a journeyman. But he can soon learn. If the middle classes took a notion to strike, it would be different. A walkout by the dentists would be rather unpleasant for a plumber with a toothache.

DO IT RIGHT.

The proposal to give public lands to returned soldiers needs a certain amount of watching. It is an excellent one, if it does not operate to the soldiers' disadvantage.

It has been charged that the present scheme is to select land lying in desert districts or in swamps, and to impose upon the soldiers the work of reclamation. If this is true, it is an unconscious imposition.

The purpose of such a scheme should be to reward the soldiers—not to enable the nation, or rather, that part of it that did not go to war, to profit at their expense. There are millions of acres of public land ready for cultivation at once. Give that to the discharged veterans; the swamps can be drained and the deserts irri-

gated at the public cost—not at the expense of the soldiers.

The loan offered to the soldiers to furnish them with the necessary funds would not discharge the nation's debt, as the advances must be repaid at four per cent. If we are calling the grants a free gift, make them so in fact as well as in name.

MORE WORK THAN WORKERS.

Farmers of the northwest are making frantic efforts to secure men in the large cities to work on the farms for \$50 a month with room and board. But it isn't enough to tempt the idlers away from the movie signs and the carabet jazzers. Fifty a month is not much, when the cost of living is considered, but as most of the living is in board and room the argument seems a little weak.

As a matter of fact, \$50 a month with board and room on a farm is far better than the average young man can do even at the high wages in the cities, where everything is paid out in necessary living expenses.

The farm is a good place, and it is getting better every year.

That little devil, Cupid, is always pulling off some new stunt. Eloping by aeroplane is now coming into vogue—doubtless, however, because dad can not hope to overtake them in his tin Lizzie.

These interminable trade disputes raise wages and raise the devil, but they don't raise wheat or increase the factory production.

The man who sits down and waits for fortune to come to him usually finds it knocking at the door of the other fellow.

Some men are blessed with unlimited brains, but have no sense with which to apply them.

"All the world loves a lover"—but the girl. She loves ice cream.

Baby's Locomotion.

Merrill's father had just been learning to drive his car. The baby was just learning to walk, and she walked sideways. One day Merrill ran into the house and said: "Oh, mamma, come and see the baby skiddin'!"

Pugnacious Fish.

In Stam there are small fresh-water fish so pugnacious that when two of them are placed near each other they at once begin to fight. When the fish is quiet its colors are dull, but when excited it is of a metallic brilliance.

Experimental.

"Dad," inquired a small boy, "what is a test case?" "A test case, my son," replied his parent, "is a case brought into court to decide whether there's enough in it to justify lawyers in working up more cases of a similar kind!"

Status of the Shoes.

Kathleen and her mamma had just returned from a shopping trip bringing home a pair of shoes for Kathleen, but only on approval. Upon arriving home Doris, Kathleen's older sister, out of curiosity immediately started to open the package. Kathleen indignantly said, "Doris, you just leave those shoes alone; mamma only brought them home on a furlough."

Anglo-Saxons.

The Angles, or Engles, were a people once located in a part of the world now known as Schleswig-Holstein and who accompanied or immediately followed the Saxons into England. The Angles are believed to have been the more powerful race, for they occupied the larger portion of Britain, and they gave their name to the land, for out of Engle grew the word England and the Saxons made the word Anglo-Saxon.

Wood in Demand.

The unique timber of Turkey and a few other localities—the fine, hard-grained, compact boxwood so much prized for engravings, rules, etc., is now so scarce that the forest products laboratory in Wisconsin is seeking American substitutes. Only the Florida boxwood and the wahoo of Arkansas and other parts of the South approach nearby. Other hardwoods suitable for some of the carver uses include mastice, torchwood, witch hazel, great rhododendron, mountain laurel, thornapple and yellow buckeye.

Cracks At Creation.

War time measures will now take an unmeasured vacation.

If you want to go somewhere for deep quiet and profound rest, try Toledo.

The picnic season has come, and sandwiches and hard-boiled eggs are much in favor.

These July days make us feel that "a place in the sun" would be quite appropriate for Germany.

The eyes of the wet interests are now turned to President Wilson as the Great Possible Lid-Lifter.

Who dares predict what wonderful things this queer old world may see within the next twenty years?

With universal peace as its avowed object, that league of nations is producing an ungodly amount of scrap-paring.

We generally think of peace and rest as an ideal combination. Just now the combination seems to be peace and unrest.

"Come on in; Water's fine!" all the dry states have been saying. Now the wet states have their opportunity to form an opinion.

The query, "How's your poor head this morning?" and the term "katzenjammer" have become antiquated during the last few days.

The man who has been for several hours associating with tussock moth caterpillars on his favorite tree begins to pine for other society.

The man who arranges a fishing tour for his vacation is likely later to conclude that the fish decided to take a vacation at the same time.

The completed but unsigned treaty between Germany and Japan at least fulfills the purpose of giving us some very interesting summer reading.

President Wilson was at sea the last week—but probably not more so than he was at different times in Paris during the peace conference.

Lloyd George broke all precedents by signing the peace treaty with a fountain pen. It is not the first time that the gentleman has created a new precedent.

The German press is already pronouncing the peace treaty "a scrap of paper." What would the world be worth if promises did not hold nor treaties bind?

Annually the housewife wonders why Providence has decreed that canning cherries, making currant jelly, and the haying season should all come at once.

For some years the women of the Western States have had full suffrage. In the middle states they have partial suffrage, and in most of the Eastern States they just suffer for the vote.

The United States produces six and three-fourths tons of coal to every inhabitant. You will be so glad to know this in December, even though in July it seems a matter of complete indifference.

The war department has issued a summary showing that if the war had continued through 1919 the United

States was thoroughly prepared to meet it. But it had taken two years to bring about this condition. Moral: Be Prepared.

Sing a song of peace time, a treaty neatly signed, Four-and-twenty little wars in the world we find, Going right along with guns and troops and rations. Isn't that a dainty dish for the League of Nations?

Unique Nation.

Costa Rica is unique among modern nations, inasmuch as it has more teachers than soldiers. The standing army is only 500 strong, while the teachers in active service number about 2,000. For nearly 45 years the country has enjoyed internal peace.

This Dog Small Boy's Friend.

A pupil in one of the Humford (Me.) grade schools failed to come to school and when the truant officer called to learn the reason, he was told that the dog had run off with the small boy's knickerbocker's, which had been put in their usual place the night before, and which could not be located until time to attend the afternoon session.

Mr. and Mrs. M. B. Turner entered an elegant dining Sunday in honor of their grandson, J. B. Black. Those present were Mr. and Mrs. John Black and son, J. B. Mr. and Mrs. Charlie Yater and Mr. J. P. Foley.

The first principle of money making is money saving.—John Wanamaker.

Above all, teach the children to save. Economy is the sure foundation of all virtues.—Victor Hugo.

Sir John Lubbock:—Economy for the sake of economy is no doubt mean, but economy for the sake of independence is right and manly.

Our philosopher says: The farmer, that drives an auto but hasn't got a silo on his place, just thinks he's up-to-date, that's all.

Our philosopher says: Things are changin' mighty fast an' for the better too. Twenty years ago nobody was afraid of the fly an' they didn't even want him.

Red Bush Buys Bulls.

Up at Red Bush in the hills of Johnson County, the farmers got together this past spring and organized the "Red Bush Pure Bred Bull Association". This organization bought a \$200 Shorthorn Bull. Since spring two other Shorthorn bulls have been bought and brought into Johnson County.

Roll Over, Bill, You're Snoring.

Man, say the scientists, is the only living thing that ever sleeps on its back. Perhaps it is from a feeling of pride that some of us make so much noise when indulging in this accomplishment.

SITUATION IN BRIEF
On Eastern Division Of The Dixie Highway.

CHATTANOOGA, TENN.—The situation in brief on the eastern division of the Dixie Highway between Cincinnati and Knoxville is as follows:

Kenton county, Covington county seat, fourteen miles with six miles of concrete and paved city streets and two additional miles under contract. It is the intention of this county to eventually pave the entire mileage of the Dixie Highway.

Boone County, Walton principal town, eleven and one half miles morn macadam. This was a toll road bought by the county at the instance of the Dixie Highway Association. On account of the fact that the highway only cuts thru one edge of the county it is difficult to secure funds for the construction of the road. However, the county authorities have promised to resurface this road this year. Grant county, Williamstown, the county seat, 23 miles worn macadam. This county has voted the twenty cent road tax which will give this county funds to improve.

Scott county, Georgetown the county seat, 28 miles. \$100,000 of Federal and county funds will be available for resurfacing the macadam mileage thru the county.

Fayette county, Lexington county seat, 24 miles. Entire mileage is of asphalt macadam has patrol system and funds with which to keep highway in first class condition. County is now building main roads of concrete.

Madison County, Richmond county at 32 miles. Graded and surfaced with the exception of 5.5 miles south is now being constructed. A well surfaced road thru the county will be of Berea, which is under contract and provided by fall of this year. A movement was started a year ago for the construction of a new highway.

Rockcastle county, Mt. Vernon the county seat, 32 miles. Of the first 14 miles from the Madison county line to Mt. Vernon, one half is of gravel and 5.5 miles macadam surfacing. One half mile between the gravel and macadam must be graded, with the balance graded. Of the eleven miles from Mt. Vernon to Livingston, 1.5 miles are surfaced, 9 miles graded and .5 miles yet to grade. The convicts are at work south of Mt. Vernon. From Livingston to Rockcastle River a contract has just been let for \$81,000 for grading crossing of Gauley Mountain. No 6.75 miles which will eliminate the provision has been made for the surfacing required to complete the road, other than that Commissioner Wiley has offered the county Federal and State aid. No provision has been made for the bridge across Roundstone creek at Livingston, or for the partnership bridge across Rockcastle River. A movement has been started to get the county court to authorize the issuance of \$100,000 in bonds to provide the funds to meet the Federal and State Aid.

Laurel county, London the county seat, 30 miles. Of the 16 miles between the Rockcastle River and London, the first fourteen miles has been graded ready for surfacing and the balance surfaced. From London to Corbin six miles is surfaced, one mile being graded with an additional .2 to be graded followed by seven miles of railroad grade which has been surfaced with limestone. The state highway department thru Commissioner Rodman Wiley has offered this county three fourths of the cost of completing the highway out of Federal and State Aid. A movement is now on foot to start a campaign for a bond issue or to raise funds in some way for the county's one fourth of the cost.

Whitley county, Corbin, Williamsburg, principal towns 34 miles. Of the 18 miles of the highway between Corbin and Williamsburg, two miles will be regraded and the balance resurfaced. This was a pike road built about four years ago. From Williamsburg the next twelve miles has been recently graded and convicts and free labor are now engaged in extending this grade to Jellico. The county expects to complete this difficult grading by fall of this year. A bridge across Clear Fork has been completed but unconnected gaps where forces are working caused a difficult detour. The abutments are up on the second bridge at Saxon and the steel on the ground. A most difficult detour of five miles was necessary to get into Corbin. The state highway department thru Commissioner Wiley has agreed to give sixty per cent of the cost of completing the

highway thru the county out of Federal and State Aid. The plans and specifications will be completed within two weeks.

Campbell county, Tennessee, Jellico, LaFollette and Jackboro principal towns, 27 miles. Of the 16 miles from Jellico to LaFollette all but three miles has been graded with seven miles of this line of the highway surfaced. Gangs are now at work completing the grade. Due to the fact that the approach to a new wooden bridge had not been completed, the tourists were compelled to raise the floor of the bridge sixteen inches in order that the cars with the wind shields removed might pass under. From LaFollette to the Anderson county line, a distance of 11 miles, a surfaced highway is now provided. Campbell county has \$140,000 in the bank to meet a like amount of Federal Aid allotted to them by the state highway department of Tennessee to complete the highway thru the county and resurface the old macadam road to the Anderson county lines.

Anderson County, Clinton county seat, 19 miles. The highway thru this county has been surfaced. Anderson county has \$25,000 to meet a like amount of state aid to regrade and surface two miles of the highway eliminating a bad hill.

Knox county, Knoxville county seat, 15 miles. Surfaced in good condition.

Education Bill

Endorsed. Mother Goose Up-To-Date.

The Smith-Towner Bill (H. R. 7) introduced at the opening of the special session of the Sixty-sixth Congress, by Congressman Towner, of Iowa, at the request of the National Educational Association and the American Federation of Teachers has been endorsed by the Board of Trustees of the Lancaster Graded and High Schools and the teachers of the Garrard-Boyle Institute. The resolutions passed by a unanimous vote of the Board of Trustees on June 2nd follows:

Whereas, The Educational bill (H. R. 7), creating a Federal department of education and providing Federal aid of \$100,000,000 annually for education in the States, introduced by Congressman Towner at the opening of the special session of the Sixty-sixth Congress, will soon be up for passage, and

Whereas, The passage of said bill will further increase the effectiveness of present educational activities of the nation, state, county and local district; therefore

Resolved, That the Board of Trustees of the Lancaster Graded and High Schools on behalf of this community and Kentucky endorse said bill and ask its immediate passage; and be it further

Resolved, That a copy of this resolution be sent to Senator J. C. W.

Beckham, one to Senator A. O. Stanley, and one to Congressman Robison, a member of the House Committee on Education, and a copy given to the Central Record for publication.

Done by unanimous vote of the Board of Trustees of the Lancaster Graded and High School, this 2nd, day of July, 1919.

L. G. Davidson, Secty. Lancaster, Ky.

The Smith-Towner Bill creates a Department of Education and authorizes appropriation for Federal aid to education to the amount of \$100,000,000 annually to be distributed as follows:

1. For removal of illiteracy, \$7,500,000.
2. For education of foreigners, \$7,500,000.
3. For health education, \$20,000,000.
4. For preparation of teachers \$10,000,000.
5. For the equalization of educational opportunities, for partial payment of teachers salaries, for providing better instruction, for extending school terms, etc., \$50,000,000.

This is the greatest step ever undertaken by the Federal government for aiding the states in education. These appropriations will stimulate state and local taxation; but the bill in no way interferes with state autonomy or local control.

The Smith-Towner Bill was endorsed by the Kentucky Press Association last week at its meeting in Louisville.

If We Can Why Don't We.

Can we lead the world in Thrift? If we try we can.
Can we cause the cloud to lift? If we buy we can.
Can we make the U. S. the place Of a successful, better race, Can we want and woe efface? Sure! By Thrift-Saving Plan. F. M. C.

The seed of every great fortune in America today was the Savings Habit.

SALE.

On SATURDAY, JULY 12th, at 3 P. M., at my residence on Campbell street, I will sell to the highest bidder my household and kitchen furniture, garden implements, 3 incubators, brooders and many chicken conveniences, 1 buggy, 2 large heavy timbered feed bins and Carpenter tools. S. T. LEAVELL.

Buy it, My Boy, Because it's a Studebaker.

That's reason enough son—because it's a Studebaker. I learned that lesson before you were born. And my father learned it before me. There isn't any "better" than Studebaker. There can't be. I read something in a newspaper the other day about Studebaker wagons, and I cut it out; I like to hear good things about old friends.

Listen to it: "Wherever wheels turn—wherever roads are built—wherever commerce cleaves its way into the wilderness—anywhere in the world—there the traveler from America meets with a thrill of patriotic pride the name that is synonymous with vehicle service and vehicle value."

Fine, isn't it? And gospel true, too. I remember your Uncle William, the time he went to Europe, back in 1891, telling me how good it made him feel to find Studebaker wagons in the little out-of-the-way places, and to find, too, that the name Studebaker stood just as high over there as it did here.

But that isn't what I'm getting at. What I mean is, that you'd be safe today if you bought a Studebaker wagon with your eyes shut—you could be sure you were getting the best money's worth your dollars could buy.

What I mean is, that the Studebaker notion of building the good old-fashioned golden rule into their wagons hasn't let down the thousandth part of an inch in fifty years.

Don't you see that nothing anyone else may offer you can take the place of that downright positive Studebaker certainty?

Suppose if all the wagons the name Studebaker have built were strung out in a line they'd go around the globe half a dozen times.

And I've never heard of one that didn't make good.

Don't let anyone get your mind off that idea—buy it, my boy, because it's a Studebaker.

CULTIVATION NEEDED IN CORN PRODUCTION

Object Is to Promote Early Growth and Development.

Methods Will Vary to Meet Requirements of Planting—Prevent Weeds From Robbing Soil of Moisture and Fertility.

(Prepared by the United States Department of Agriculture.)

Approximately 100,000,000 acres of corn in the United States are annually given two or more cultivations. Cultivation is considered essential in the corn production. The general purpose of cultivation is to promote the early growth and later development of the corn plant. The usual type of cultivation is sometimes modified to meet special conditions, such as retarding the vegetative growth of the plant by cutting the corn roots in early cultivation. The kind of cultivation will also vary to some extent to meet the requirements of different methods of planting.

Some of the most successful corn growers begin their cultivation before they plant their crop. They claim that a deep cultivation of the soil at this time is of as much value as later cultivations. It causes the soil to warm more quickly, destroys early weed growth, and incorporates the vegetable matter more thoroughly into the soil.

Corn is cultivated to prevent weeds from robbing the corn of soil moisture and fertility, to put the surface in the best condition to absorb rainfall, to warm the soil by drying its surface quickly, and to save moisture by checking the capillary rise to the soil surface.

Corn should be cultivated often enough to keep down the weeds and to maintain a loose soil mulch until the crop has attained its growth. To satisfy this end a greater number of cultivations will be necessary when rains at intervals of a week or so cause the surface soil to run together and crust. This crust must be broken and

Cultivation Is Essential in the Production of Corn.

the soil mulch restored or excessive run-off and evaporation will soon rob the crop of much-needed moisture. Promptness in restoring the soil mulch after each rain is of great importance. This work can be rapidly and less expensively performed by use of double cultivators widened, and by driving astride each alternate row, as by this practice the mulch is restored in half the time necessary to drive astride of every row.

Corn should not be cultivated so long as the soil mulch is in good condition and free of weeds. Corn should not be cultivated when the soil turns up in clods, breaking the corn roots and permitting the soil to dry out to a greater depth than it would if not cultivated.

HAY CROPS FOR LIVE STOCK

Many Farmers Unmindful of Necessity of Providing for Fall and Winter Feeding.

(Prepared by the United States Department of Agriculture.)

The high price of rough feed emphasizes the necessity of all farmers planting a sufficient acreage of summer forage crops to enable them to provide themselves with hay and other roughages for their live stock during the coming year. With the abundance of pasture available in the springtime farmers oftentimes are unmindful of the necessity of providing for that period during the fall when pasture will be dry, or during the winter when there will be no feed available.

The county agents should be consulted with reference to the availability of seed. Where outside purchases have to be made the offer should be placed at once, so that the seed may be on hand to sow when the soil is in good condition and the season is not too far advanced.

Among the several summer hay crops for the Southwest sorghum or Sudan grass are undoubtedly in most favor. In the southeastern territory sorghum and cowpeas, planted any time before the first of July, will mature a great abundance of good quality rough feed for mules or cattle. The county agents should be consulted with reference to best crops for local conditions, method of planting and quantity of seed per acre to be used in different localities.

OLD AGE STARTS WITH YOUR KIDNEYS

Science says that old age begins with weakened kidneys and digestive organs. This being true, it is easy to believe that by keeping the kidneys and digestive organs cleansed and in proper working order old age can be deferred and life prolonged far beyond that enjoyed by the average person.

For over 200 years GOLD MEDAL Haarlem Oil has been relieving the weakness and disability due to advancing years. It is a standard old-time home remedy and needs no introduction. GOLD MEDAL Haarlem Oil is enclosed in odorless, tasteless capsules containing about 5 drops each. Take them as you would a pill, with a small

swallow of water. The oil stimulates the kidney action and enables the organs to throw off the poisons which cause premature old age. New life and strength increase as you continue the treatment. When completely restored continue taking a capsule or two each day. GOLD MEDAL Haarlem Oil Capsules will keep you in health and vigor and prevent a return of the disease. Do not wait until old age or disease have settled down for good. Go to your drugist and get a box of GOLD MEDAL Haarlem Oil Capsules. Money refunded if they do not help you. Three sizes. But remember to ask for the original imported GOLD MEDAL brand. In sealed packages.

Draw A Check

for the money you owe and note how much more respectfully your creditors regard you. They like to do business with a man who has an account at the

Garrard Bank & Trust Co

They know he is doing business in a business like way. Better open such an account even if your affairs are not large. They will grow all right.

The Garrard Bank & Trust Company

Daily Thought.

A man's own observation, what he finds good of, and what he finds hurt of, is the best physic to preserve health.—Bacon.

Something to Worry About.

Considering how little is accomplished, one sometimes wonders if it is really worth a hungry elephant's time to eat so small a thing as a peanut.

Best Method of Rising.

Some trust to luck—some rely upon influence—some expect promotion without self-assertion—but the persevering rise upon the wings of will.—Herbert Kaufman.

From the Heart.

Our favorite books are few; since only what rises from the heart reaches it, being caught and carried on the tongues of men whosoever love and letters journey.—Alcott.

Enjoyment Spoiled.

A little girl's mother had just bought her a bright red coat which she had never worn. There being a death in the family her mother dressed her and decided it not best to wear such a bright coat, so put on an old black one. As the child noticed this she began to cry and said, "If I can't wear my new red coat I sure won't have a good time at the funeral."

Home of Nymphs.

Near the cape of Shima, in Japan, there is a village the name of which in Japanese means "The settlement of Nymphs." Woman in this village is the predominant partner. The chief industry is pearl fishing and the women are the fishers. The men stay at home and do the work.

African Idea of Beauty.

In Africa a crop of the blackest, curliest, closest hair imaginable makes a girl the belle of the kral, especially if she be plump, with piggy eyes, thick lips, a nose like an India rubber shoe, and a skin that shines like a cooking stove.

Have Record for Laziness.

The Todas of India are said to be the laziest people in the world. The men of the household club together to take one wife to support, and then they let her do the work. The Todas have reduced the simple life to the formula: Do only what you must, and very little of that.

Write Agricultural Bureau.

We wonder if one could raise forage for a nightmare in a garden of dreams.—Columbian Missourian.

Look then, into thine heart and write.—Longfellow.

EUROPEAN CORN BORER MOST DANGEROUS PLANT PEST IN EASTERN MASSACHUSETTS

Borers Do Most Damage by Their Work in Stalks and Ears.

(Prepared by the United States Department of Agriculture.)

The European corn borer threatens the future of America's greatest crop. This pest plies his trade with the industry of a beaver to the extent that he is the most dangerous plant pest that has yet immigrated from foreign fields to the corn lands of Uncle Sam. The larvae, or borers, hungry as half-starved rats, tunnel through all parts of the corn plant excepting the roots, and destroy or severely injure the ears and stalks. That their diet may have variety they also attack celery, Swiss chard, beans, beets, spinach, oats, potatoes, tomatoes, turnips, as well as dahlias, chrysanthemums, gladioli, geraniums, timothy, other grasses and weeds. Two generations occur each year, so that multiplication and spread are rapid, especially as few are destroyed by natural enemies.

Specialists of the United States department of agriculture, in Farmers' Bulletin 1046, describe the danger to American corn by the presence of the European corn borer in eastern Massachusetts. They surmise that the pest was introduced in raw hemp imported from Europe for use in Massachusetts cordage factories, or possibly in bales of broom corn imported by factories in central New York. There are 35 towns in Massachusetts, including an area of about 320 square miles, infested with the insect, which has been confined to the limits of its original infection except for an outbreak discovered in January in the vicinity of Schenectady, N. Y., covering an area of approximately 400 square miles.

How the Borer Works.

The larvae, or borers, tunnel through all parts of the corn plant except the fibrous roots. They cause the most serious damage by their work in the stalks and ears, which they partially or totally destroy. Generally they enter the stalk at its upper end and near the base of the tassel, and at first tunnel upward. This damage so weakens the tassel stalk that it breaks over before the tassel matures, resulting in loss of pollen and the lack of normal grain formation on the ears. These broken tassels, with extrusions of sawdust-like material at the breaks, are the most conspicuous signs of infestation in the field. Field counts in badly infested areas have shown as many as 60 per cent of the tassels broken over in this manner. After destroying the tassel the borers tunnel downward through the stalk, gradually increasing the size of their tunnels as they develop. Instead of entering the stalk near the tassel many of the borers enter between the leaf sheath and stalk at a point lower down, and tunnel upward or downward according to their individual preferences. When several or many borers are working within the same stalk it soon is reduced to a mere shell. This injury cuts off the supply of nutriment from the developing ear and greatly weakens the stalk, which eventually breaks over. Some of the partly grown borers leave the stalk and enter the ears through the husks, and also through the stem and cob. Here they feed upon the immature grain and tunnel through all parts of the cob.

Eggs Laid in Summer.

In July and August many of the moths deposit their eggs directly upon the newly developed ears of late corn. The resulting crop of borers feed at first upon the silk and then enter the ears directly, where they feed voraciously upon the grain and cob. As many as 15 full-grown borers, each about an inch long, have been found feeding upon and within a single ear of corn. This extensive injury to the ear results in its complete destruction. Some idea of this damage may be gained from the fact that 75 plants, comprising 17 hills, were selected at random from a badly infested Massachusetts corn field, and all the borers found therein were carefully removed and counted. Forty-six borers, on an average, were found in each plant, while one of the plants contained 117 borers. One hill consisting of four plants contained 311 borers. At the average rate of 46 borers a plant, an acre of corn could contain over a million of these pests. The borers enter and damage other crops mentioned previously in the same way as described for corn, but usually to a less serious degree. In addition to the actual loss caused by the work of the borers, there is also the possibility that some of these products, when shipped to market, may contain the insect and thus serve as carriers of the pest to new localities.

Although the female moths of the European corn borer are capable of flight, and may extend gradually the present limit of the pest by natural spread, the chief danger of the country's corn crop lies in the possibility that such plant material infested by the insects may be transported throughout the country and start other sources of infestation. In order to combat this danger it will be necessary strictly to enforce all federal and state quarantines, prohibiting the transportation out of the infested area of all plants or plant products likely to be infested by the borers.

A most effective method of destroying the European corn borer is to burn all of the previous year's corn stalks, corn stubble, crop remnants and stalks of garden plants, weeds and larger grasses that may contain the overwintering borers. This must be done during the late fall, winter and early spring, while the borers are hiding in such material. Infested plants may also be disposed of when practicable by feeding them to live stock or by burying them in a manure or compost heap. It should be clearly understood that each and every plant likely to be infested must be destroyed. This includes the stubble and upper part of the roots. Occasionally plants or parts of plants which may seem hardly worth the trouble to clean up are likely to harbor enough borers to give rise, by the end of the season, to as many insects as were present before the cleanup operations began.

Burning Most Effective.

Complete burning is undoubtedly the most effective and cheapest method known for the destruction of infested material, especially during the late fall, winter and spring, when the vegetation is dead and dry. It may be necessary to sprinkle the plants with oil or to use other fuel to secure complete combustion. Where it is possible and safe to use a running fire in destroying infested plants, this is the quickest means.

In some cases, particularly in that of corn, the infestation may be controlled by feeding the grain to live stock either directly from the field or as ensilage. From the economic standpoint this is the best possible means of destruction. In some infested districts it is common for the owners of dairy cows to collect fodder from the sweet corn plantings of the market gardens as well as from home gardens after the crop has been harvested. Where fodder is fed green it should be run through a shredder or cutting machine before it is given to the live stock, as this process greatly reduces the chances that any of the borers contained therein will survive.

The practice of plowing under infested material is not recommended, because plowing, even when carefully done, will not cover the material deeply enough to prevent the borers from making their way to the surface, and few stalks may remain exposed.

Experiments in applying arsenical poisons to the surface of corn plants have shown that large numbers of the borers may be poisoned in this manner during the early stages. At this period they feed to a slight extent on the surface of the plants, especially on the leaf plants. It was found impossible, however, to protect the plants entirely in this manner, as the number of borers not killed by the poison was sufficient to damage the stalks and ears severely. The cost of applying these poisons is prohibitive, because several applications are necessary, and the method is not recommended.

PROFITABLE PERIOD OF HEN

Unless Fowl Is Especially Good Breeder She Should Be Disposed of When Three Years Old.

The hen's greatest profit-producing period is the first and second years, and unless a hen is an especially good breeder she should be disposed of at the end of her second laying season and before starting to molt.

TOMATO AND POTATO CROPS

Former Has Certain Qualities That Make It One of Most Desirable Garden Plants.

The tomato is closely related to the potato, and while the actual food value of the tomato is not so great as that of the potato, it has certain qualities that make it one of the most desirable of our garden crops.

Two Fine Garrard County Farms AT AUCTION Tuesday Morning, 10 o'clock July 15th, '19

162 Acres For Floyd Curtis

85 Acres For J. C. Williams

In the famous "Camp Dick Robinson", known every where as most desirable land.

Travelers through this section can hardly keep the commandment "Thou shalt not covet." Both farms front on the Mt. Hebron Pike, the Curtis farm just 1-2 mile from Lancaster and Lexington pike, 1-2 mile from Graded School, 1 mile from Bryantville, that growing village with its stores, churches, Bank, schools, etc. The Williams farm is just 1-2 mile farther on the Mt. Hebron Pike.

Either farm a DANDY home, in an ideal location.

No other farms in this neighborhood for sale. They just won't price.

162 acre tract will be sold in three tracts; 85 acres with most improvements, 50 acres with tenant house and tobacco barn. 27 acres, no improvement. Purchaser of any tract will have the chance to buy either one or both of other tracts, each tract with broad frontage on pike.

IMPROVEMENTS:—8 room dwelling, 2 tenant houses, one large stock barn, the best in the County with water and fully equipped for feeding 100 cattle, large box stalls; one new tobacco barn, all necessary out buildings.

The 85 acre Williams farm will be sold in two tracts, one tract of 45 acres with improvements, one tract of 40 acres, no improvements. The improvements consists of new 5 room bungalow, 2 porches, good cistern, 4 acre tobacco barn, 40 acres in corn, 4 acres tobacco, 20 acres in meadow, balance in grass. Splendid frontage on Mt. Hebron pike; beautiful yard. A nice place to live.

The 162 acres has 40 acres in corn, 10 acres in tobacco, 112 acres in grass. Both farms are well watered. Curtis farm has a fine orchard, beautiful yard with large shade trees right on the pike.

The farms are a good "Buy" for two families wanting to locate in same neighborhood close to splendid graded school and with other advantages.

These farms will be sold for the High Dollar.

I "turn down" Auction Sale propositions every few days. I only contract for those I know will appeal to the buyers, therefore, I always sell what I offer. The purchaser gets the benefit of my judgment as to values. Attend my sales and see how they are conducted. We want to show you the land before day of sale. Get in touch with us.

POSSESSION OF BOTH FARMS ON JANUARY 1, 1919. TERMS EASY.

DINNER ON THE GROUNDS.

Will also sell a lot of personal property as follows;

1 sorrel mare, 9 years old; 1 three year old Peavine filly; 1 two year old horse colt; 1 yearling filly, 1 yearling horse colt; 1 red shorthorn cow and calf at foot; 2 year old red cow, calf at foot; 1 red cow, fresh in the fall; 2 two year old steers; 1 roan shorthorn bull; 7 year old jersey cow and calf, 5 year old jersey cow and calf; 5 extra buck lambs and a lot of other stock and household and kitchen furniture.

This will be an all day sale. Come early and spend the day with us.

Follow my sales, I will make you money. At each one of my auction sales the purchaser has either sold at a profit or been offered a profit within a short time.

SWINEBROAD, The Real Estate Man

W. E. MOSS, Advertising Manager.

LANCASTER, KENTUCKY.

Look up the advertisements for sales on the 16th, 21st, 22nd and 23rd of July. Also farms for sale privately.

Found Road to Happiness.

I have been a great deal happier since I have given up thinking about what is easy and pleasant, and being discontented because I could not have my own will.—George Elliot.

Musings of Martha.

If th' weddin' ceremony included, besides "love, honor and obey," "cook his meals, wash his clothes, darn his socks, an' sew on his buttons," there'd be fewer hasty marriages.

Have Your Tires Retreaded

We use the Dry-Cure Vulcanizing process of retreading—not half sole—and can rebuild a tire at less than half price.

3500 MILES GUARANTEED

FIDO, JR.

By MARGARET L. AHERN

(Copyright, 1919, by the McClure Newspaper Syndicate.)

For the third consecutive day Marjorie Hill spent 15 minutes of her noon hour gazing covetously in the store window. And for the third time Lieutenant Dan Taylor, lunching alone at his club across the street, watched her with growing curiosity.

Then, the proud possessor of two gold service stripes and a wound stripe, was feeling rather bored after his strenuous activities of the past year. This state of affairs was possibly due to the fact that there had been no girl waiting for him "over here." His interest was aroused now for the first time since his return home.

"If it was a fur coat she was looking at so earnestly," he soliloquized, "or a platinum bracelet watch, or a rose-colored evening gown—I could understand it. But it's a bird and animal store. I wonder if it's a parrot or a canary she wants?"

While he watched the girl went inside the store. Dan hastily paid his meal check and hurried across the street. He, in turn, stared in the window at the miscellaneous assortment of livestock.

On one side some tiny white mice were huddled in a squirming heap in a cage. "No girl in her right mind would even look at those things," was the lieutenant's sarcastic comment.

On the other side of the window two white, curly-haired dogs frisked around. "Inane pups," muttered Dan. "She doesn't look like the kind of a girl who would carry one of those toy lambs around."

In the center of the window was an iron cage, and presently its occupant—a small but very fat Boston terrier—was thrust in unceremoniously. The girl inside the store leaned over to play with him for a moment, and Dan had a delightful glimpse of rosy cheeks and brown eyes. When she left Dan followed her through the noonday crowd until she entered a large bank building.

A few minutes later the president of the bank was shaking hands joyfully with the lieutenant. "It surely does make your old uncle glad to see you again, Danny," he said, "and if there's anything at all I can do for you—"

His offer was accepted with suspicious alacrity. Dan explained glibly that he wanted to look over the contents of his safety deposit box, and since his right arm was still lame, possibly he could have the assistance of one of the clerks. For answer his uncle pressed a button beside his desk. A young woman appeared almost immediately. Dan, maneuvering to a position back of her, frantically signaled to his uncle. The latter, hiding a smile, dismissed his efficient employee with some casual instructions, and asked her to send Miss Hill to him.

Miss Hill proved to be the girl of the bird store. From her demure blush as she acknowledged the introduction to the eager lieutenant, he suspected that she recognized him. It was arranged that she should work with Dan that afternoon at least; but he made haste to assure his uncle that the clipping of innumerable coupons would probably necessitate another full day's work.

During the afternoon a minimum of business was transacted by Dan and his acting secretary. However he found time to tell her of the big kennels at his country place, and of his favorite pet, the ugly-looking bulldog named "Old Ironsides." "He'll try to—I mean, he could—eat that little chap in the birdstore in one mouthful," said Dan.

And Marjorie confided to him her longing to possess the "little chap." She told him how she had figured that five dollars was a sufficient sum for such a tiny puppy, and how she had been saving up a "dog fund"; and then of her disappointment at learning that the small dog had a most distinguished and high-class canine family tree—being a direct descendant of Ringmaster I—and his present owners refused to part with him for less than twenty-five dollars.

Needless to say, the puppy of unimpeachable ancestry disappeared from the store window the next day. When the president of the bank returned after lunch that noon, he found an unexpected visitor tied to his desk. A note from Dan explained the situation. It read as follows: "I am paying my charming assistant, not in coin of the realm but in the original way you see hitched to your desk. Don't dare remove him. He will be called for at 5 o'clock."

Dan's uncle viewed the pup with a quizzical smile. Fortunately, he liked dogs, too. "I suppose," he remarked thoughtfully, "that you have to be fed at more or less frequent intervals, like all infants. Although—pardon my rudeness, old man—from the contour of your small anatomy you don't look as though you had room for a drop more." An excited office boy was presently sent out to procure some milk for the puppy.

Then, still holding Dan's note, his uncle sighed and addressed the pup again. "Perhaps you understand, Fido, junior—a vigorous wagging of a diminutive tail testified that Fido, junior, understood perfectly. 'You have been the cause of my nephew coming in here and taking my best stenographer.'"

Italy, in her new budget, is proposing to tax bachelors.

SATISFY!

—what the deuce does that mean?

It means that NEW thing in a cigarette, that does for your smoke-hunger exactly what a drink of cold water does for your thirst!

To satisfy, a cigarette must do more than please the taste—it must "touch the smoke-spot."

That's what Chesterfields do. They let you know you are smoking—they SATISFY.

And here's why—Chesterfields have body. The finer, silkier leaves of TURKISH have been properly blended with several varieties of the best DOMESTIC tobaccos, famous for their full-bodied flavor.

SATISFY is something that no cigarette, except Chesterfields, can give you—regardless of price. Because no cigarette maker can copy the Chesterfield blend.

Say "Chesterfield" to your dealer.

Liggett & McCarty Tobacco Co.

Chesterfield CIGARETTES

—of Turkish and Domestic tobaccos—blended

This is the package with the moisture-proof jacket that keeps Chesterfield's original freshness and flavor intact.

They SATISFY!

Curiosities of the Calendar.

It will be found that January always begins on the same day of the week as October, and the same is true of April and July, September and December. Again February, March and November also begin on the same day of the week. This, however, is only true in years of 365 days.

Carrying Cocoa to the Coast.

An interesting spectacle in the African Gold Coast country is the transport of cocoa, the bulk of the inland produce being carried by porters to the railway. Sometimes the roadways as far as the eye can see are one long line of cocoa bags on the heads of hundreds of carriers.

Astonished Daddy.

June is having some difficulty in settling upon the proper title for her father. The other day she was playing with one of his collars when she tore it. Just then she heard him coming upstairs, and rushing to the top step, called in distressful tones: "Oh daddy, I have torn my hubble's collar!"

FARM for SALE Privately

I am in position to offer you privately one of the very best farms in Madison County, located 8 miles from Richmond on good pike, good new six room dwelling, new stock and tobacco barns, housing room for 25 acres tobacco and land now cultivated to fill, 90 acres corn, 30 acres meadow, about 300 acres excellent blue grass, with cattle in the field and everything in fine state of cultivation.

Will price this one for immediate possession or will sell for January 1st, delivery.

If one or two good men want to buy a farm that will make money and one that is now ready to plow, call or write, or come to see me and I will show you something worth while.

PAINT LICK, KENTUCKY.

TREND SEEMS TO BE TOWARD MOTORIZED FARMS, ELIMINATING ALL HORSE POWER

Plowing With a Small Tractor.

(Prepared by the United States Department of Agriculture.)

Manufacture of tractors for agricultural use has grown greatly in a comparatively few years, but a big field is still open to manufacturers in the small farmers' business, which can be gained only by the introduction of all-purpose tractors that can be used economically on farms of under 100 tillable acres.

Prior to 1905 practically all power plowing was done by steam. If there was any machine in use at that time employing an internal-combustion engine as its source of power, the case apparently has never become a matter of record. Steam plowing has been in vogue for a number of years, especially in regions such as the Dakotas, Montana, and the Canadian provinces of the Northwest. Here were found bonanza farms consisting of thousands of acres, one crop of wheat sometimes paying for the entire farm. These large tracts, stretching away for miles in a level and unbroken plain, offered conditions which were suitable for these mammoth steam outfits weighing many tons.

Several factors had a bearing on the elimination of steam as a source of power for plowing and the substitution of the internal-combustion engine.

The fuel was bulky for the power transmitted, and the storage space on the engine was small. Several men were required. The steam engine as then constructed could not stand the constant strain and rough usage necessary in plowing. It was necessary to spend considerable time in care and repair, just as is required by the railroad locomotive after a five or six hour run.

How Use of Gas Engine Began.

There was a demand by operators for a machine which would do away with these disadvantages. Interest was shown by various manufacturers and their attention was directed toward the development of a machine using the internal combustion engine.

Apparently 1905 was the first year that a gas tractor advertised as a source of power was placed on the market. This machine employed a double-cylinder engine, using gasoline for power and oil for cooling. It had a rating of 22 nominal and 40 actual brake horsepower and was capable of pulling six to eight 12-inch plows, depending on the soil. The weight was practically the same as that of the steam engine, about nine and one-half tons. While operators were not satisfied with the steam tractors on the market, there was then considerable prejudice against the gas tractor, so that machines were built which looked as much like a steam engine as possible. Perhaps this fact, to some extent, tended to overcome the prejudice and make for the popularity of the outfit.

By 1908 so much interest was manifested throughout the Northwest in the gas tractor that it was decided to hold a motor competition in connection with the industrial exhibition at Winnipeg, Canada. During the week of July 13-17, 1908, this contest was held, the first of its kind on the American continent. Machines were exhibited by five companies; two other companies entered, but withdrew. The rules of the contest limited the weight to seven and one-half tons to keep out steam rigs. This rule barred one gas tractor, as it weighed nine and one-half tons.

Early Tests Unsatisfactory.

The tests upon which final award was based consisted of hauling, plowing and manipulation. Some of the soil conditions were not ideal, and a bad impression was given in the hauling tests. The barred machine put on a private demonstration and made an excellent showing, using kerosene, except to warm up the motor at the beginning. The significance of this contest was that the weak points were shown and that it started the development of practical motors for small farms.

In 1909 a similar test was held at Winnipeg and six companies demonstrated machines. The contest was divided into four classes: (a) Internal combustion 20 horsepower and under, (b) 20-30 horsepower, (c) over 30 horsepower, and (d) steam engines. This contest created much interest in manufacturing circles, and many manufacturers were present to obtain useful information, which showed that they were alive to the possibilities attending the development of a successful tractor.

To Winnipeg must go the honor of starting an idea which has done a great deal to develop the tractor industry rapidly. These tests were the forerunners of others in various sections of the United States and Canada

that have given farmers the opportunity of seeing these machines at work and deciding on the merits of the individual tractors.

Tractor Shows Develop.

In 1909 five tractors were exhibited at the Omaha land show. It was intended to make the exhibition a permanent feature, but failure to find suitable land for plowing caused the idea to be abandoned. Not until 1913 was anything on a large scale attempted in the United States. Then a demonstration was held at Fremont, Neb., in which 23 manufacturers exhibited 29 tractors. From this time on a national tractor demonstration has been held each summer, with an ever-increasing number of manufacturers exhibiting until at the last show, held in Salina, Kan., in 1918, over 300 machines were entered, and 53 manufacturers were represented. A winter meeting is held each year at which manufacturers of tractors and accessories exhibit. This show has been held in Kansas City, Mo., for the past four years. Various local shows are put on each summer, and since 1916 these have continued throughout the summer, beginning in Texas and continuing northward. In March, 1919, the first large demonstration of the year was held in the South at Macon, Ga., which shows that the South is alive to the possibilities of tractor farming.

The following production figures show the enormous growth of the tractor industry in the comparatively short time it has been in existence:

FARM MACHINERY—FARM POWER.

MARCH 15, 1915.

1912 11,699

1914 15,000

1915 21,000

FARM EQUIPMENT CONTROL, UNITED STATES DEPARTMENT OF AGRICULTURE.

1916 23,479

1917 32,742

1918 122,769

MANUFACTURERS' ESTIMATED PRODUCTION.

1919 214,500

As previously stated, there was estimated to be between 45 and 50 firms or individuals making or attempting to make tractors in 1909. The office of farm management, United States department of agriculture, has always kept in close touch with the tractor industry, and the files show that in 1909 there were 102 firms actively engaged in manufacturing tractors and 102 firms and individuals planning to begin in the near future.

Character of Tractor Changed.

In the beginning the tractor was constructed to simulate the steam engine in appearance. As time passed and prejudice disappeared many refinements took place until today it is a compact, well-built machine capable of performing a multitude of operations. The first machines were heavy, rough affairs, capable of pulling eight, ten, or more bottoms. It was soon recognized that if the industry were to prosper a machine would have to be built which would be practical for ordinary-sized farms. The result was that small machines came on the market, built to pull two and three plows. This type of tractor appealed to the small farmer.

There are now more two and three plow machines built than of all other sizes combined. There are, however, a number of companies still making a large-size tractor, which is still used on the big farms of the Northwest and the Pacific coast.

How Tractor Was Transformed.

From the rough machines of 1908 and 1909 with single cylinders, chain drive, cast gears, excessive weight, exposed working parts, and poor accessibility have been developed machines of light weight with inclosed working parts, friction and various gear drives, electric fixtures, radiator cooling systems, cut and hardened gears, multiple cylinders, air cleaners, kerosene carburetors, one-man control, and easy accessibility—all this at a price of one-half to one-fourth of the early machines.

Owing to varying conditions, there are two types of machine on the market at present—the crawler and the wheeled type. The purpose of the crawler is to prevent miring down on soft ground. The same principle was employed by tanks in the late war. The wheeled tractors are more numerous and employ various devices to obtain traction, such as lugs, grousers, spikes, cleats and extension rims. Again, some wheels have a device giving a stepping arrangement, as in the P-T wheel, which was developed by two Italian army engineers. A few tractors employ both the crawler and wheel.

As yet the tractor industry is comparatively young, and what its ultimate effect on farming will be it is impossible to say.

PRINCE ALBERT

LAY your smoketaste flush up against a listening post—and you'll get the Prince Albert call, *all right!* You'll hunt a jimmy pipe so quick and get so much tobacco joy out of every puff you'll wish you had been born twins! For, Prince Albert puts over a turn new to every man fond of a pipe or a home made cigarette. It wins your glad hand completely. *That's because it has the quality!*

And, right behind this quality flavor and quality fragrance is Prince Albert's freedom from bite and parch which is cut out by our exclusive patented process. We tell you to smoke your fill at any clip—jimmy pipe or makin's cigarette—without a comeback!

Tappy red bags, tidy red tins, handsome pound and half pound tin humidors—and that clever, practical pound crystal glass humidor with sponge moistener top that keeps the tobacco in such perfect condition.

R. J. Reynolds Tobacco Co., Winston-Salem, N. C.

FAIR STOCK

DO NOT NEGLECT HERD BOAR

Management Is Important Part in Raising Strong, Healthy Pigs—Deserves Best Care.

(Prepared by the United States Department of Agriculture.)

The management of the herd is a very important part in the raising of strong, healthy pigs, and one which is sometimes neglected. He should be the most valuable animal in the whole herd, and as such deserves the best of attention. The boar should be purchased from a breeder of pure-bred hogs when between eight months and one year of age. Many breeders, however, purchase a boar when a weanling pig, but to be successful in this choice requires a wide experience and sound judgment. Aged boars which have proved their worth can sometimes be purchased at a reasonable price. It is much safer for an inexperienced breeder to buy an old, active boar than a young untried boar. If possible, the farmer should visit the herd where the boar was raised and note the conditions under which he was bred. At any rate, it is always possible to obtain from the breeder notes on the health and kind and amount of feeds used, so as to serve as an index to his subsequent treatment.

Upon arriving at the farm the boar should be unloaded as soon as possible and placed in quarantine to guard against the introduction of disease into the herd. If he is lousy it is well to treat this condition at once. His feed should be a continuation of that to which he has been accustomed, feeding rather lightly the first few days until he recovers from the strain of shipping and becomes accustomed to his new surroundings. If it is not feasible to continue feeding as previously indicated, the change to a more convenient ration should be made very gradually in order not to disturb the appetite or health of the animal.

Champion Duroc-Jersey Boar.

animal. As a rule, a pig 8 to 12 months old will be in proper breeding condition when received unless he has been very heavily overfed. In purchasing an older boar, particularly one which has been in the show circuit, it is often necessary to reduce his condition before attempting to breed. With some animals the breeding power is permanently impaired by too high condition at some time in their life. The boar should be well fed but not fat, as a too high condition makes him inactive, a slow breeder, and a rather uncertain sire.

After the breeding season the boar should not be fed so heavily, and should have a wider ration, that is, one containing less of the protein concentrates and relatively more corn. The ration at this time is practically the same as that fed the brood sow when she is not producing a litter of pigs. He should have the run of a pasture a quarter of an acre in area in connection with his paddock. Here he can exercise and obtain much of his feed from the forage, or in the winter when the forage is consumed he may be fed on alfalfa or clover hay in connection with the grain ration. Keep the boar healthy, give him exercise, plenty of rough feeds, and keep him in condition by varying his supply of grain. Under such conditions little trouble will be experienced in getting a normal boar to produce large litters of strong, healthy pigs.

PIG CLUB MEMBERS PROSPER

Some Have Been at Work Long Enough to Have Porks for Sale and Make Money.

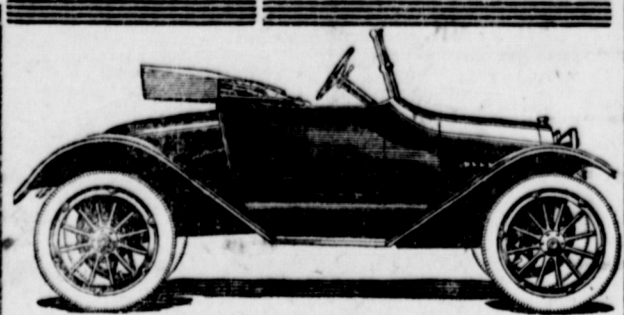

(Prepared by the United States Department of Agriculture.)

Pig club members in Florida are working up an industry among themselves. Some of the members who have been in club work long enough to have some pigs for sale are disposing of their stock to other club members. One club boy has sold \$100 worth of pigs to club members this year. Another, who joined the pig club two years ago, is now furnishing pigs to other members, and says he is glad he went into the club work, and believes that every boy and girl who can do so should join.

ATTENTION TO BROOD SOWS

After Weaning Her Pigs She Should Be Kept on Pasture and Fed Gaining Grain Ration.

The sow having weaned her pigs, should be kept on pasture and fed a gaining grain ration to build up her system and flesh for re-breeding, and provide nourishment for the oncoming fall litter.

THE CHEVROLET MOTOR CAR

The Chevrolet Motor Car is up-to-date in every respect. Built for service and comfort.

Four Ninety Roadster, \$715.00

F. O. B. Factory.

A car load of these American Beauties just unloaded. They have marvelous power, and noted as hill climbers. Let us demonstrate.

PAINT LICK GARAGE COMPANY

Paint Lick, Kentucky.

Endurance.

Endurance, not fleetness, wins the race. Never give up. Keep pegging away even though everything looks hopeless. Many a man has failed to achieve both fortune and fame because he lost courage just as he was within reach of them. What you desire may be only one step ahead. Keep going.

Ant Development.

Ants have developed nothing remotely resembling industrial organization. Many unnecessary conclusions have been drawn from comparing neuter (undeveloped female) ant workers with the unmarried women of modern industry. A comparison with child labor would be truer. For ant workers are always "lunger" forms—stunted creatures who have no economic opportunity to grow up—who are forced by family necessity to venture out for food before they reach full growth.

Retain "Perspective."

We say of a painting that the "perspective" is good—meaning that we can see far ahead, beyond the apparent background to imagined beauties still further in the distance. Many people have not this perspective; they see only the pebbles and shallow water in the foreground and, stepping to dabble their feet in the first pleasant invitation to ease and coolness, they lose the call and lure of the deep pools and forests farther on, content to stay at the half-way house, even forgetting that they once held a faint vision of castles of accomplishment.

Umbrella Improvement.

It is the little things which make for perfection, we are told. An inventor has perfected a device which certainly shows a taste for perfection. No one is unfamiliar with the strip of tape with a catch which is used snugly to wind up closed umbrellas. When the umbrella is open this piece of tape tangles and pandulates in a way that undoubtedly is offensive to the dignity of some. The inventor in question has made an invention which provides means of stowing away the pendant into the interior of the opened umbrella by means of a snapping device.

Daily Thought.

Write to the mind and let the ear glean after it can.—Baillet.

Cousin Bill Says:

"When a man thinks he has left his watch at home and takes it out of his pocket to see if he has time to go back for it, I should call that man absent-minded."

Broader Smiling Face.

"Ah ain't passin'ly smilin' wid dis yar cootie," remarked Shimbone, "but Ah reckon he a nigger an' dan a sartin' nigger."—Dorothy Franks.

Napkins.

Table napkins were in use long before some of the other accessories which we consider indispensable today. Before forks came to be known, men had to use their fingers in preparing their food; hence the ancient custom of frequently passing the basin of water and its accompanying napkin for wiping the hands. It now seems incredible that forks were not customary until the seventeenth century.

Old Name for February.

The old Britons gave the nickname "FEBRUARY" to February, not because it is a particularly wet month, the average rainfall being the least of any month in the year, but because the melting snow on the hills causes the rivers and dykes to overflow. When there is a superabundance of snow and rain in February there is too much of what would be a good thing in moderation, and floods where they are least welcome.

Dominoes for the Blind.

Dominoes for the blind are rather ingenious. Recognizing the need of something that would not easily be misplaced, the fingers of the blind passed back and forth reading the numbers on the face of the dominoes, the inventor has given us a set of interlocking pieces. The mortise joint unites them hold together no matter how much they are brushed around. The number on each piece is indicated by the raised heads of brass tacks easily read by the touch.

Labor Endorses Thrift Movement.

Strong Labor Organization at Hannibal Adopts Strong Resolution Urging Subordinate Bodies To Get Behind Campaigns.

Labor in Hannibal, Mo., is solidly behind the War Savings Campaign. The Trades and Labor Assembly, which is made up of the delegates from each labor union in Hannibal and Marion County, last week were on formal record as endorsing the movement by the adoption of resolutions.

Not only this but by vote of the Assembly a letter of introduction, containing a copy of the resolutions, was given J. R. Blackwood and O. G. Sandford, state organizers, appointed by Federal Director Wilson of St. Louis, for presentation to the individual unions.

The organizers are this week perfecting working organizations in each union, and the interest in the movement is widespread. Not only are the members of the union responding, but the members of their families are filling out pledge cards and practicing the doctrine of Thrift.

DEVONIAN

Giving Red Blooded Men a Chance

High Blood Pressure is preeminently the disease of hustling red blooded American Business Men. Too close confinement to business, working too hard—that's the way he usually looks at his own case. He is partly right. But the real cause lies further back. In his rush to succeed in business, he has neglected his digestive system. "Out to Lunch; back in ten minutes," has too frequently been his programme. Now he is paying the penalty, not of work, but of self-neglect. Most cases of High Blood Pressure, physicians tell us, have their origin in long neglected constipation. Devonian, the American Medicinal Mineral Water, is preeminently the water for red-blooded, high-pressure American Business Men suffering from High Blood Pressure. It has been so systematically successful in these cases that many physicians have come to rely almost wholly upon it. Their records show patients restored to sound health. Men rejected for insurance have been made insurable. It eliminates the food waste that has been poisoning him. Yet, unlike purgatives, oils and pills, it is not a drastic cathartic. Easy in action but thorough, it induces regularity, the first step toward recovery. It supplies the stimulation that his business concentration has prevented Nature from supplying. Devonian comes to you just as it flows from its natural source a thousand feet underground, without alteration or condensation in any way. A tablespoonful in a glass of water is the usual dose. In a quart bottle there are 64 average doses, making the cost about one cent and a half each. You may be on the road to High Blood Pressure. Be warned now and send for our booklet, "Giving Red Blooded Men a Chance." It will show you how to know yourself and tell you what Devonian has done for others.

Take a Tablespoonful of Devonian to a Glassful of water.

For sale by most drug stores in the city.

TO PROTECT LOCUST TREES FROM BORERS

Plant in Thick Stands to Produce Shaded Condition.

With Underbrush About Trunks of Trees Injury by Insects Is Less—Protection Is Needed for Very Short Period.

(Prepared by the United States Department of Agriculture.)

Plantations of the locust tree can be successfully protected from the borer and grown profitably on a commercial scale if the trees are planted in thick stands or mixed with other trees, so as to produce a densely shaded condition during the first ten to fifteen years. Investigations of the United States department of agriculture showed that more trees were destroyed by borers in tracts which had been pruned occasionally or closely grazed, or in which fire had killed out the underbrush, thus destroying the natural shade produced by weeds and shrubbery.

The danger the underbrush about the trunks of the trees, the less the damage done by borers. Trees growing from two to three feet apart were seldom injured, while nearby isolated trees were riddled by borers.

All trees and all parts of the tree are not subject in the same degree to attack by the borer. Rough bark provides crevices in which the borers deposit their eggs. Young trees, less than one and one-half to two inches at the base, are not attacked unless the bark is rough. On younger trees the borers are found at the base and near rough crotches. Trees with trunks more than five or six inches in diameter rarely contain the insects. On such trees the larger branches frequently are infested; but such injury is seldom common enough to do much harm. Protection from borers is necessary for only a comparatively short period during the tree's growth. Under good growing conditions this time should not exceed ten years.

The locust is widely planted for ornamental and shade purposes. It is highly desirable because it grows readily in a variety of soils and situations. It grows rapidly and forms a shapely crown when planted in the open. But it is frequently attacked by borers. This is because shade trees are planted singly and in the open, thus furnishing favorable conditions for attack.

Young borers can be killed readily by the use of an arsenical spray. Spraying will be necessary only every two or three years unless badly infested trees nearly are not treated. As a rule, spraying will not be needed after trees reach six inches in diameter. Trees of that size are usually immune from attack, but should be watched.

Locusts make such desirable shade trees that they should not be neglected and allowed to become injured or destroyed by borers. The increasing value of black or yellow locust for many purposes makes it a profitable tree to grow commercially and emphasizes the importance of protecting it from the borer.

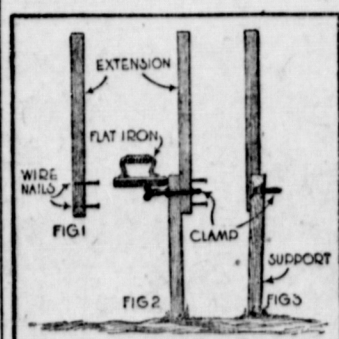

FOR INCREASED TOMATO CROP

Illustrations Show How Supports Can Be Constructed to Hold Plants in Position.

It is usually necessary to attach a vertical extension to a large number of stakes in the tomato patch at certain stages of growth.

The extensions are first prepared by driving wire nails into them, so that the points of the nails are flush with the surface of the opposite side, as in Fig. 1.

Each piece is then fitted into position and held by an ordinary iron

Helping the Tomato Plants to Get Up in the World by Means of Lengthened Supports.

clamp, as in Fig. 2. Holding the end of a flatiron against the bottom stake will steady the support while the nails are driven through and clinched.

This device will help in getting every top stick "plumb,"—James M. Kane, in Popular Science Monthly.

USE EFFECTIVE LICE POWDER

Always in Order in Ridding Fowls of Insects—Kerosene Will Exterminate Mites.

(Prepared by the United States Department of Agriculture.)

The free use of an effective lice powder is always in order. A dust bath is very essential in ridding the fowls of lice. Whitewashing is effective against vermin. Use kerosene on the roosts and in the cracks to exterminate mites.

The Flavor Lasts

Spasmodic Sermon.
Telephonely speaking, crossed lines end to cross words.

Moroccan Charm.
Moroccan wives have a recipe for winning back affection. The suspicious wife draws a line of honey from forehead to chin and collects the drippings. Then she rubs the tip of her tongue with a fig leaf till it bleeds and soaks seven grains of salt in the blood. This she mixes with the honey and puts the dose in the erring husband's food.

Daily Thought.
Valor consists in the power of self-recovery.—Emerson.

Steel and Iron.
Steel is a kind of iron which can easily be hammered out thin without cracking and can be made extremely hard by being heated and then cooled quickly. It is different from ordinary iron because of the amount of carbon in it. Wrought iron contains less carbon than steel and so it cannot be made so hard; cast iron contains more and so is brittle.

STOP! LOOK! LISTEN!

We are equipped with machinery to do all kinds of

AUTOMOBILE AND GAS ENGINE REPAIRING

On all makes of Automobiles or Engines. We can furnish you with a new battery or repair your old one.

We have installed an up-to-date battery charger and are now ready for battery charging.

PAINT LICK, KY.

SPEAKER GILLETTS STATEMENT

Presiding Officer Of
Lower House of Congress
Tells of the
Nation's Needs.

The following is a signed statement made by Frederick H. Gillett, of Massachusetts, Speaker of the House of Representatives in Congress:

"When the United States entered into the great world conflict the people were asked to lend their dollars to help defray the war bills. The interest on these dollars which were invested in Liberty Bonds and War Savings Stamps consisted not only in increased return of money, but in something more concrete. The money lent to the Government during the war helped to bring victory, the most precious dividend ever declared, and that victory, is shared by all, even by those who did not lend their money to the Government.

"The Government is still in need of funds to help meet our post-war obligations. If victory means anything to us as Americans we should all be willing to do our share in meeting the obligations incurred in achieving that much desired goal. The dividend to be declared this time will be possible because of the victory won. It will be a dividend manifested in terms of ships bringing back to us our brave boys who bled that we might live, in terms of increased happiness and prosperity and economic stability. "By investing in War Savings and Thrift Stamps we are not only helping the Government in a very concrete way, but are doing it by helping ourselves."

Natural Curiosity.

Nature has played one of her eccentricities on the location of a former sugar mill on the island of Trinidad. The plant has since been reduced to ruins and is overgrown with vegetation. The old solid chimney is intact and up through its center one of the quick growing trees of the tropics has sprung, spreading its branches out of the top of the huge chimney and is now in full bloom.

Physicians' Oath.

A part of the Hippocratic oath is as follows: "Whatever, in connection with my professional practice, or not in connection with it, I may see or hear in the lives of men which ought not to be spoken abroad, I will not divulge, as reckoning that all such should be kept secret." This oath is respected by every court in the world, and rarely indeed has it ever been broken by a reputable physician.

Club Screens School.

Home Demonstration club work in Henderson County is fighting the fly. This sanitary campaign is bearing fruit. At a meeting at Staples, in that County, the matter of screening the school was taken up and discussed. One club member donated the screen door and every other member present pledged herself to share in the expense of screening the windows. This club plans to have this work done in time for the opening of school.

Boys Buy Bank Stock.

Marshall County has a banker who is very farsighted, especially when it comes to the citizens of tomorrow. A recent report to the College of Agriculture contains the following: "Had a good meeting of the boys around Birmingham Saturday afternoon. The banker there, Mr. M. L. Cox, who is financing the sheep club, made the boys a proposition that struck me as far sighted. He is contemplating increasing the capital stock of the bank in order to give those boys an inclined opportunity to become stock holders in his institution. He is doing it solely as a constructive business proposition for the boy and the bank. Club work has emphasized to him the importance of the boy."

At Death's Door.

"I was talking with my neighbor, Mr. Webb, the other day, regarding the great trouble his stomach had given him. He said he suffered 7 or 8 years, and had been almost at death's-door a number of times from acute indigestion and bloating of gas, which seemed to shut off his heart action. He said he wouldn't have lived much longer if he hadn't taken Mayr's Wonderful Remedy when he did, which made a well man of him." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.

R. E. McROBERTS, Druggist, Lancaster, Kentucky. Adv.

230 ACRES LINCOLN COUNTY LAND AT AUCTION WEDNESDAY, JULY 16th 10 O'CLOCK.

I will sell to the highest bidder the first class and highly productive farm of S. E. Sanders and W. S. Carrier, on the Rush Branch pike, near Hubble, 5 miles from Stanford, 6 miles from Lancaster, 7 miles from Danville.

The best location ever. Accessible to three markets. Farmers in this neighborhood always get a better price for stock and farm products by reason of the competition of buyers from three county seats. Make inquiry of these farmers and you will find this is true.

The land is very fertile, level and rolling, long frontage on pike. Will be subdivided and "SOLD" in several tracts from 25 to 100 acres in each tract. Look it over before day of sale and we will "bunch" two or more tracts if you want to buy it that way.

Main dwelling, 5 rooms, porches, etc., one 3 room tenant house, one 5 room tenant house, 2 stock barns, 3 new tobacco barns.

35 acres in corn, 20 acres in tobacco,
40 acres in wheat stubble, 10 acres rye and grass,
20 acres orchard grass and clover, 110 acres Blue Grass.
Everlasting water.

See this farm before you buy. In the BEST neighborhood in Kentucky. Close to school and churches. Most centrally located. Sale made to dissolve partnership.

What is the use of further description? "My goods are on the counter". Look them over. Attend this sale and get one of the bargains in land. This will be a money maker for some one.

Possession January 1, 1920.

Easy Terms.

SWINEBROAD,

THE REAL ESTATE MAN.

LANCASTER, KENTUCKY.

W. E. MOSS, Advertising Manager.

Look up the advertisements of my auction sales on July 15th, July 21st, July 22nd and July 23rd.

MAXIMUM SEED CROP IS URGED

Seeding of 1918 Was Lost in
Many Sections of Country
on Account of Drought.

CONTROL OF CLOVER FLOWER

Best Method Is to Destroy Larvae of
First Brood—Adults Do Not Live
Very Long—Watch Horses Pasturing on Alsike.

(Prepared by the United States Department of Agriculture.)

Even if there should be a good season for clover, the crop of seed cannot be as large as the country needs, because the seeding of 1918 was lost in a great many sections through drought. It is desirable, therefore, that a maximum seed crop be produced if possible. The method of controlling this clover flower midge is to destroy the larvae of the first brood. The adults that have lived over winter will lay their eggs in the flowers of the first crop of red clover. These adults do not live very long, and if the first crop can be kept from producing bloom when the adults are flying, or if the blooms can be cut before the larvae mature, there will be very few, if any, adults to attack the second or seed crop of red clover. Details in regard to this matter can be found in Farmers' Bulletin 971.

Seed From June Clover.

It is sometimes desired to get seed from the first crop of June clover, and this may be done by pasturing the clover heavily enough to keep down the bloom until the latter part of May. At this time the stock may be taken off; and, in that case, the June clover will seed at about the same time as the mammoth usually does. However, the common practice is to take a crop of hay and allow the second crop to make seed. When this plan is followed, care will have to be taken to control the clover-flower midge in accordance with the instructions found in Farmers' Bulletin 971.

Danger in Alsike.

During this month, also, farmers pasturing their horses on alsike clover should keep watch of their animals.

A Good Field of Timothy and Clover Hay, With a Large Part of Clover.

especially those having white faces and white feet. A number of instances have been reported where horses have been poisoned by eating alsike clover. These instances have been numerous enough to show that alsike clover has a detrimental effect at certain stages of its development. Unfortunately, nothing is known yet as to the reason of this effect, but the fact that it does occur is sufficiently well established to warrant a warning on the part of the department. When horses feeding on alsike clover are observed to have sores around the face and mouth, they should be immediately taken off the alsike clover and put upon hay or a grass pasture. This will cure the difficulty.

RIDDING CHICKS OF VERMIN

Little Piece of Lard Rubbed on Back of Head and Neck Is Quite Efficient Remedy.

(Prepared by the United States Department of Agriculture.)

Head lice on chicks is one of the drawbacks from now on. No let up in fighting these pests should be allowed. There are many remedies on the market, but a little lard about the size of a pea rubbed thoroughly on the back of the head and neck is sufficient to rid the chick of these pests. This should be done after dark on a dry, warm night. Previous to this the coop, hen or brooder should be thoroughly attended to.

FEED AND CARE OF CHICKENS

Department of Agriculture Has Issued Circular Which Will Be Found Important.

(Prepared by the United States Department of Agriculture.)

Now that hatching is over in many sections and will be over very shortly everywhere, the real important factor is feeding and care of the youngsters. The department of agriculture at Washington issues a circular on "First Care of Baby Chicks," G-30, which is very helpful.

**THORNHILL
WAGONS**

BUILD a wagon of wood that grows rapidly and under easy conditions, and you have a wagon that cannot stand abusive wear. Nature when hurried shirks her work like man. But build one—as Thornhills are built—of tough highland oak and hickory—that grows slowly upon the mountain side—that survives only after a ceaseless battle with soil and climate—then you have a wagon almost wearproof. The tough close-grained wood is endowed with double strength. Let us show you the Thornhill wagons and explain the value of the Thornhill way.

W. J. ROMANS LANCASTER, KY.

HAIL SPELLS DESTRUCTION

I am writing a combined policy that should attract every tobacco grower in the county. It gives you protection in the field against HAIL, and in the barn against FIRE, LIGHTNING, WINDSTORM AND TORNADO. This policy automatically covers your first load into the barn. For instance, if by chance you should happen to have a load in the barn and a storm arises with hail and lightning, and your crop is destroyed in the field by hail and your barn is struck by lightning (this happened twice last year) burning same, you will collect for damage done by Hail as well as your load in the barn.

I also wish to announce that I can now give you \$200.00 an acre protection in the field against Hail. Several have asked for this and I have had to refuse until today, but I have it for you now.

HAIL RATES.

\$50.00 limit per acre in field for hail alone at \$4.00 per acre.
\$100.00 limit per acre in field for Hail alone at \$7.00 per acre.
\$200.00 limit per acre in field for hail alone at \$14.00 per acre.

COMBINED HAIL, FIRE, LIGHTNING, WINDSTORM, & TORNADO RATES.

\$50.00 per acre against Hail with \$200.00 per acre in barn for three months at \$6.40 per acre.

\$100.00 per acre against Hail, with \$200.00 per acre in barn for three months at \$9.40 per acre.

\$200.00 per acre against Hail, with \$200.00 per acre in barn for three months at \$16.40 per acre.

From all available indications it looks as if Tobacco will be as high this year, if not higher, than last, as few planted as much as last while others not any at all, so why not spend a few dollars and protect you.

Policies go into effect at noon (12 o'clock) Thursday, July 10th, so act at once. Either phone, write or see me at the GARRARD BANK or KENGARLAN HOTEL.

The Cultivator You Hear About

THERE are a lot of cultivators on the market. Some are good—others not so good. But there is one that nearly every farmer has heard about.

International No. 4 Pivot Axle Cultivator

Every man that has ever used an International No. 4 is always ready to say a good word for its clean work and easy operation. Every man that has a boy of 14 or over ought to put him in the field with a No. 4. Chances are he will beat his dad at doing a clean job.

You can dodge in crooked rows and clean out the weeds in a way that will surprise you. This is because the wheels pivot and the gangs shift with one slight motion of the foot. Easy?—It is the simplest cultivator you ever rode on. You can change the cultivating width without stopping the team. Just a twist of the wrist.

The only way to satisfy yourself that we are not stretching the truth and also to learn about the many other exclusive features of the No. 4 is to come in and take a look at our samples.

BECKER & BALLARD

A. T. Scott, Garrard Co. Tax Com.

Mr. and Mrs. Jesse East and daughters, Flora B., and Martha, spent Sunday with Mr. and Mrs. Virgil Sebastian.

**"OH, IF I COULD
BREAK THIS COLD!"**

Almost as soon as said with Dr. King's New Discovery Get a bottle today!

The rapidity with which this fifty-year-old family remedy relieves coughs, colds and mild bronchial attacks is what has kept its popularity on the increase year by year.

This standard reliever of colds and coughing spells never loses friends. It does quickly and pleasantly what it is recommended to do. One trial puts it in your medicine cabinet as absolutely indispensable. Sold by all druggists.

Bowels Usually Clogged?

Regulate them with safe, sure, comfortable Dr. King's New Life Pills. Correct that biliousness, headache, sour stomach, tongue coat, by eliminating the bowel-cloggers.

MT. HEBRON

Miss Bernie Montgomery of Lancaster is at home for a stay.

Mr. J. B. Dean who has been on the sick list is able to be out.

Miss Mollie Grow and Mrs. Maggie Tracey of Judson attended services here Sunday.

Miss Bettie Scott of Nicholasville was the week end guest of Mr. and Mrs. Edd Grow.

Mr. and Mrs. Evan Rogers of Cincinnati were the guests of Mr. and Mrs. W. L. Grow, recently.

Mr. and Mrs. James Hamilton were the guests of her parents Mr. and Mrs. F. W. Montgomery Sunday.

Mrs. William Crawford and children of Sulphur Well were the guests of Mrs. James Crawford Sunday.

Mr. and Mrs. Elisha Forbes of McCreeary were with relatives here Saturday and Sunday and attended services.

Miss Jennie Rogers and Mrs. Fred Peel and little son, Welch were with their sister, Mrs. W. L. Grow Saturday night.

Mr. and Mrs. Jesse Duncan and children of Buena Vista were with Mr. and Mrs. Harrison Dean Saturday and Sunday.

Misses Emma and Lillian Pierce of Bryantville spent a part of last week with their sister, Mrs. E. C. Montgomery at Lock 8.

Mr. Dennie Scott and sons Woolford and Walter were here for preaching Sunday and with his mother, Mrs. E. F. Scott.

Mr. and Mrs. J. J. Montgomery of Hickman and Mrs. W. B. Montgomery of Lancaster spent the week-end with Mr. and Mrs. A. O. Montgomery.

Mr. and Mrs. Thos Hicks were with Mr. and Mrs. Elijah McMillan on Wolf Trail Saturday night and Sunday and attended services at Scotts Fork.

Please call at my office in the Court House and list your taxable property for this year, as the time is fixed and limited by the Law. DO NOT PUT THIS OFF.

A. T. SCOTT, Garrard Co. Tax Commissioner.

Mr. William Middleton died at his home at Jessamine Station Wednesday. He was 96 years, 10 months and 9 days old and had been quite ill for some time. After funeral services his body was laid to rest in the Mt. Hebron Cemetery Thursday.

CARTERSVILLE.

Mr. Jerry Miller who has been very ill with typhoid fever is better.

Mr. D. L. Gabbard has gone to Mississippi to spend a few weeks.

Mr. D. M. Carter sold a nice milk cow to Mr. Preston Ward for \$65.

Ms. Mary Smith of North Carolina is visiting her brother, Mr. J. M. Smith.

Mrs. Walker Nantz who has been ill for a few weeks, continues to grow worse.

Misses Mary Lee, Lillian and Amanda Calico and Messrs Lionel and Eugene Calico visited relatives at Manse Saturday night and Sunday.

On last Tuesday Mr. Ebb Cooley lost his dwelling and contents including about \$300 in money by fire. The loss was partly covered by insurance.

Please call at my office in the Court House and list your taxable property for this year, as the time is fixed and limited by the Law. DO NOT PUT THIS OFF.

A. T. SCOTT, Garrard County Tax Commissioner.

The remains of Miss Elsie Miller were laid to rest in Cartersville cemetery last Wednesday afternoon. She died after a brief illness of typhoid fever. She was 22 years of age and the only daughter of Mr. Eli Miller.

Commercial Travelers Endorse Thrift.

Commercial Salesmen in East Realize Value to County of Savings Campaign

By unanimous vote the convention of the United Commercial Travelers in session at Cumberland, Md., recently, endorsed the Thrift and Savings Movement of the United States Treasury Department. The convention was attended by leading traveling men from the district which embraces Virginia, West Virginia, Maryland and Kentucky. Not only was the movement given endorsement, but the convention pledged itself to do all in its power to advance it. It was the sense of the convention that thrift should become a national habit, inasmuch as the great promise of America's industrial and commercial power lies in the ability of the people to conserve the country's resources and supervise expenditures of material and money with careful minds.

Rain by X
An Australian inventor has patented a method for producing rain by raising large X-ray bulbs into balloons into higher strata of air that are filled with moisture.

Unwise Business Men
There be those who are ready to rush into great ventures on suspicion, as it were, not having made a careful and exhaustive survey of the situation, nor having counted the cost.

Testing for All Wool.
Anybody can tell whether it is all wool or not by boiling out a little piece in a test-tube with a solution of caustic soda over an alcohol lamp. Whatever does not dissolve is not wool. This piece of chemical wisdom is propounded by the Little Journal.

When Money is a Curse.
It is only when money is cheapened to worthlessness for some, and made impossibly dear to others, that it becomes a curse. In short, it is a curse only in such foolish social conditions that life itself is a curse.—George Bernard Shaw.

Evidently No Lover of Cards.
It is very wonderful to see persons of the best sense passing hours together in shuffling and dividing a pack of cards with no conversation but in different figures. Would not a man what is made up of a few game phrases, and no other ideas but those of black or red spots ranged together laugh to hear any one of his species complaining that life is short?—Addison.

Country's Dark Days.
The saying, "not worth a continental," came from the fact that the continental currency, issued by the continental congress, was worthless, or nearly so, during the revolution and after. As the continental congress had no power to levy taxes it was unable to redeem its promises to pay. Besides, the country was flooded with counterfeit bills which could not be detected.

Canada's Water Power.
An important feature of the water powers of Canada is their fortunate situation with respect to existing commercial centers. Within economic transmission range of practically every important city from the Atlantic to the Pacific, except those in the central western prairies, there are clustered water-power sites which will meet the probable demands for hydro-power for generations.

Gossip About People

A Brief Mention of the Comings and Goings by Those We Are Interested In.

Mr. and Mrs. Joe E. Robinson have returned from a short stay in Cincinnati.

Mrs. M. M. Miller of Lexington is visiting her sister, Miss Amanda Anderson.

Mrs. Cyrus Eason of Salvisa, Ky., is the guest of Mrs. Pendleton Cox, this week.

Miss Joe Faulconer of Hillsboro, O., is the guest of her grandmother, Mrs. W. B. Mason.

Miss Sue Sutton has returned to Marksburg after a visit to Mrs. J. I. Hamilton.

S. T. Leavell is critically ill at the home of his niece, Mrs. Robert Campbell, of Danville.

Mr. and Mrs. Joe Boggs of Richmond have been recent guests of Mr. and Mrs. D. Gulley.

Mrs. J. E. Robinson and Miss Joan Mount motored to Lexington last Saturday for the day.

Miss Iva Montgomery left Monday for Frankfort after a pleasant week's visit with home folks.

Mrs. Elizabeth Hughes has returned from a visit to her daughter, Mrs. J. W. Avey, in Stanford.

Miss Martha Bettis of Lexington, is the guest of her mother, Mrs. Ellen Bettis, on Maple avenue.

Mrs. Ada Kinnaird of Atlanta, Ga., is the guest of Dr. and Mrs. J. B. Kinnaird, on Maple Avenue.

Mr. and Mrs. W. B. Bradshaw of Decatur, Illinois, came this week for a visit with Lancaster relatives.

Mrs. Dollie Brown gave quite an enjoyable theater party this week in honor of Mrs. Miller, of Lexington.

Mrs. Louis Landram, Miss Lucille Sutton, Mr. and Mrs. Clay Sutton were visitors in Danville Monday.

Mr. and Mrs. George McRoberts and little daughter, Betsy Margaret, are with Mr. and Mrs. Joe Burnside.

Mr. and Mrs. James Ross and little daughter, Miss Mary Miller and Mrs. Miller of Lexington are visiting Mrs. Dailey.

Master George Hagan has returned home after a two week's visit with his aunt, Mrs. J. C. Ballard, of Cartersville.

Mr. and Mrs. Harvey Sutton of Cincinnati, have been recent guests of his sister, Mrs. Ben Hughes and Mr. Hughes.

Mrs. W. R. Cook, Mrs. Val Cook and Miss Helen Elizabeth Sprague, of Louisville were visitors in Danville, Monday.

Mr. and Mrs. Milton Ward and Mr. and Mrs. James K. Ward of Abilene Texas, were visitors of Mrs. W. G. Clark, Monday.

Mrs. Ollie Buck and little daughter, Grace Curtis, of Danville were visitors of Mrs. W. B. Ball, on Richmond Street, Monday.

Mrs. V. A. Lear, Misses Marilee and Nancy Thomas Lear motored to Graham Springs, Friday and spent quite a delightful 4th.

Miss Ruth Montgomery of Bourne, was the guest most of last week of Miss Lillian and Eulalia Montgomery on Crab Orchard street.

Mrs. Mae Hughes Noland and daughter, Miss Nellie, have gone to Lake Chautauqua, N. Y., where they will spend several weeks.

Miss Joe Hord Frank is visiting friends in Sturgis.

Mrs. T. K. Watson of Ely's Ky., is the guest of Mrs. John M. Farra.

Mrs. Mary A. Green, of Burgin, is visiting her daughter, Mrs. Hager.

Miss Mary Noel of Danville, is the guest of her sister, Mrs. J. B. Woods.

Mrs. William Hopper of Burgin, has been visiting friends in Lancaster.

Mrs. Margaret Payne of Lexington, is visiting her sister, Miss Jane Hopper.

Miss Mary Miller Woods has returned from a delightful visit to relatives in Danville.

Mrs. Earnest Sprague, of Louisville, spent the week-end with Mrs. W. R. Cook.

Mr. R. L. Walker has returned from a visit to relatives in Richmond and Nicholasville.

Mrs. Helen Bryant, of Lexington, is visiting Mrs. Bid Robinson, on Richmond street.

Miss Laverne Hicks has returned from a visit to Miss Mary Margaret Jordan, in Lexington.

Mr. J. E. Dickerson and daughter, Miss Pearl Dickerson, were visitors in Richmond, Monday.

Mrs. Jack Casey has returned from a visit to her sister, Mrs. Forest Fitzgerald, in Danville.

Mrs. Lizzie Richardson, of Lexington, is expected this week for a visit to her sister, Mrs. Bid Robinson.

Mrs. Sallie Kruger, of Bowling Green, is the guest of her sister, Miss Jane Hopper, on Richmond street.

Mrs. L. M. Leland, of Tacoma, Washington, is visiting her niece, Mrs. G. M. Patterson, on Richmond street.

Mr. Richard Lackey has accepted a position at McRoberts Drug Store, and will be delighted to see his many friends.

Mr. Homer Batson and daughter, Nancy Phillips, of Louisville, spent the week end with his father, Mr. R. H. Batson.

Mr. Stanley Gulley, who has just returned from overseas, has received his honorable discharge and returned to Lancaster.

Mrs. Rollins Burnam, Mr. and Mrs. Jennings Greenleaf and children, of Richmond, have been recent visitors in Lancaster.

Mr. and Mrs. John Murphy of Indianapolis, spent several days here the past week with Lancaster and Garrard relatives and friends.

Miss Amelia Greenwald, head trimmer in Mrs. Rella Arnold Francis' millinery parlors, has returned to her home in Chattanooga, Tenn.

Dr. and Mrs. J. J. Pursley and handsome little son, of Louisville, are the guests of her parents, Mr. and Mrs. Allie Sanders, on Danville St.

Mr. and Mrs. R. L. Elkin have returned from a week end visit to Mr. and Mrs. Warren Witherspoon at their hospitable home in Lexington.

Mrs. James Layton, of Covington, and Miss Edna Gulley, teacher of the School for the Deaf in Canada, are guests of Mr. and Mrs. D. Gulley on Danville avenue.

Mr. and Mrs. J. J. Montgomery of Camp Nelson and Mrs. W. B. Montgomery were the guests of Mr. and Mrs. A. O. Montgomery near Bourne, Saturday night and Sunday.

Major Virgil Kinnaird, who has been overseas for a year, is expected this week home. His wife who has been with her parents during the Major's absence will join him here.

Miss Allie Arnold left Monday for Graton, Mass, where she will be the guest of her friend, Mrs. E. Preston Leonard. Before her return she will visit Boston, Mass., Pittsburg, Pa., and Columbus Ohio.

Mr. J. E. Elmore is visiting his parents, Mr. and Mrs. J. W. Elmore.

Mr. Alex West has just returned from a visit to relatives in Nicholasville.

Mrs. Catheryn Tinsley, of New York City, is visiting her parents, Mr. and Mrs. J. B. Conn.

Mrs. Jesse Hendren is the guest of her parents, Mr. and Mrs. Taylor Raney on Stanford street.

Mrs. Sarah Hurt of Crab Orchard has been the guest of Mr. and Mrs. J. B. Conn on Richmond street.

Mrs. J. R. Mount entertained Wednesday at a family dining in honor of Mr. and Mrs. George McRoberts.

Mrs. R. L. Elkin entertained informally in honor of Mrs. George McRoberts and Mrs. T. K. Watson.

Mr. and Mrs. George McRoberts and daughter, Betsy Margaret, are guests of relatives here this week.

The Junior Sunday School of the Christian Church had a delightful picnic at the Iron Bridge last Tuesday.

Mrs. J. T. Peddicord and Miss Thelma Peddicord, have joined Mr. Peddicord here and are stopping at the Kengarian.

Mr. A. T. Scott, has just received word of the safe arrival of his son from overseas, he having arrived at Newport News on the 8th.

Little Georgetta Walker, the pretty and attractive daughter of Mr. and Mrs. Steven Walker, has been quite ill but we are glad to state is better.

Mr. Ed Doty of El Paso, Texas, and Mrs. J. B. Jennings and son, James, of Tulsa Okla., arrived yesterday and are guests of relatives in the city.

Mr. and Mrs. Oliver Wallace and two attractive daughters, Miss Annie Wallace and Miss Olive Todd, were guests for the day yesterday of Mr. and Mrs. Sautley Hughes.

Miss Edna Berkele entertained at her home on Lexington avenue with an afternoon tea. A delicious luncheon of perfect appointments was served. About twelve guests were present.

Masters Charles and H. V. Bastin gave a pretty lawn party Monday night, from seven until nine. The color scheme was pink and white and was carried out in the delightful refreshments.

Mr. Brady and family, who have been spending several months in Lancaster, leave tomorrow for Washington, D. C., to reside in the future. Mr. Brady was inspector of the Government building which is about completed.

Miss Alma Griffin returned to her home in Louisville last Tuesday after a successful season as trimmer for Miss Minnie Brown. Miss Griffin made many friends during her stay in Lancaster, who hope that she may be here again the next season.

Miss Mittie Dunn entertained with a most delightful picture show party followed by refreshments served at Stormes' Drug Store. After the refreshments they were invited to the home of Mr. and Mrs. J. W. Miller to witness the fireworks of which Mr. Robert E. Hughes gave in honor of his daughter, Miss Margaret Hughes.

On last Tuesday evening Mrs. R. L. Hagan entertained her daughter, Miss Elizabeth, at a six o'clock dinner in honor of Miss Moore of Danville and Miss Marie Ballard who is at home from the D. and D. school of Morgantown, North Carolina. Those present were Mr. and Mrs. John Ballard, and daughter, Miss Marie and Miss Moore.

Mrs. E. L. Owsley entertained Tuesday evening at a picture show party in honor of Miss Helen Elizabeth Sprague, who is the attractive guest of Mrs. W. R. Cook. After the show refreshments were served at Stormes Drug Store. The guests were, Miss Helen Elizabeth Sprague, of Louisville, Miss Laura Dunn, of Lexington, Miss Francis Grant, Miss Helen Gulley, Mr. A. C. Sanders, Mr. J. R. Haselden, Jr., Mr. Samuel Elliott and George Lawson.

Mr. and Mrs. Irvin Powell entertained last Saturday evening with an informal party at their home in the country, on the Versailles pike, in honor of their cousin, Miss Laverne Hicks, of Lancaster, Ky., who is visiting Miss Mary Margaret Jordan. Music and entertaining games were enjoyed. Mrs. Powell was assisted in entertaining by her cousin, Miss Viola Bailey, and niece, Miss Avel

Powell. A delicious lunch was served and those who enjoyed the hospitality were: Misses Laverne Hicks, Viola Bailey, Avel Powell, Mary Margaret Jordan, Katherine Stutts and Mrs. A. A. Stalek, Messrs Joe Jordan, Fred Chapman and Wilmore Brewer. —Lexington Herald

Mrs. Pattie Anderson entertained the past week at her home on Richmond avenue, with a reunion of several classes of old Franklin Institute. Garden flowers and many beautiful spring blossoms filled the home thru-out, adding much to the beauty of the party. A delicious salad course was served. The guests were: Mrs. W. M. Bogle, of New Orleans, Mrs. B. A. Dawes, of Bryantsville, Mrs. Maggie Robinson, Mrs. Bid Robinson, Mrs. Mattie Duncan, Mrs. George Robinson, Mrs. J. E. Stormes, Miss Amanda Anderson and Miss Jennie Duncan.

Tail of the Fox.
One of the most notable features of the fox is his large and massive tail, writes John Burroughs. Seen running up the snow at a distance, his tail is quite as conspicuous as his body; and, so far as appearing a burden, seems to contribute to his lightness and buoyancy. It softens the outline of his movements, and repeats or continues to the eye the ease and poise of his carriage.

Undoubted Proof.
An eminent pianist was about to give a recital in a large hall. As the audience was filling in a man staggered up to the door and presented a ticket. "You cannot go in," said the official in charge. "You are not in a fit condition." "Didn't I pay for my ticket?" asked the man. "Isn't it in order?" "It's all right," was the reply, "but you—you are all wrong—you are intoxicated!" "Intoxicated? Of course I'm intoxicated! If I wasn't do you think I would come to a piano recital?"

The Astrologer.
An astrologer who was famed for his great learning and his knowledge of the stars, went out for a walk. As he walked, all the time looking up at the sky, he said to himself: "Oh, how much wiser am I than most men. All the secrets of the stars are known to me. I read them as other men read books." Thus speaking, he came to a well, but, being far too busy praising his own cleverness to notice it, he tripped and fell in headlong, and there he had to stay until his servant, hearing his cries, came and pulled him out.—Aesop's Fables.

Whence "Dutch."
The name Dutch is derived from Dietsch, meaning the vernacular, as distinguished from Latin. It is the same word as the German Deutsch. Dutch belongs to the Frankish division of the Low German, and is closely related to the Flemish, with which it is now practically identified in its written form. The Dutch language is one of the Germanic group of dialects, and is practically the same in its structure.

Mastering Worry.
The person who knows no worry is a fortunate individual (if such a human being possibly exists) but worry is well as its first causes, moves, can be mastered if we steadily take each day as it comes, smiling at its problems, and forgetting all about that "doubtful future" which some folks declare is full of woes.

Benefactor of Men.
The New York Sun's appreciation of the late Dr. Mary Walker contains this tribute: "One debt of gratitude men owe Doctor Walker which they ought not to forget. She was the inventor of the inside nequeen on shirts which protects the flesh from being rubbed by the collar button."—Outlook.

Needed Promptly.
Mr. Johnson was asked by his wife to call at a shop on his way home and get her three articles of feminine wear. When she reached the shop he had forgotten what they were, so he said apologetically to the attendant behind the counter: "Excuse me, my wife told me to come here and get her some things to wear, and I've forgotten what they are! Would you mind naming a few things?"

Lexington

The Perfected Six

IN order to fully appreciate the success Lexington has achieved in perfecting the dependable six cylinder type of car, one must take the wheel and observe—

The smooth, silent starting; the quick get-away; the rhythmic flow and ebb of power, highly responsive to your wish; the emergency brake that operates with one finger; the complete confidence and restfulness one enjoys whether taking a hill on high or inching through traffic.

Let us demonstrate this remarkably good car—it is a sound investment.

TEACH THRASHERMEN TO SAVE ALL GRAIN

Department of Agriculture Plans
Conservation This Year.

Schools Will Be Opened to Give In-
struction on Operation of Machines
and Adjustment—Many Own-
ers Are Inexperienced.

(Prepared by the United States Department
of Agriculture.)

Grain saving last year filled 11,000,000 two-bushel sacks with wheat which otherwise would have been wasted in straw stacks or over fields. To increase this conservation record this year and to facilitate more efficient operation of thrashing machines, the United States department of agriculture, in co-operation with the directors of extension work in state agricultural colleges, will conduct schools of three and four days for thrashermen. Instruction will include studies of the proper operation, adjustment, repair and maintenance of separators and gas and steam engines.

Approximately 250,000 thrashing machines are in the United States. Many owners are not thoroughly experienced in their management and repair. All are expected to be benefited

Reduce the Waste of Grain at Thrashing Time.

if they attend the thrashermen's school in their localities. Every thrasherman who is interested in saving grain, reducing idle time when his machine is out of commission, and lengthening the active service of his separator, should attend a thrasherman's school where he will be taught the when, why, where, and how to operate a thrashing outfit and keeping it in the pink of working condition.

The purpose is primarily to improve thrashing conditions. Instruction will cover the theory of the separator, the operation, care and adjustment of the machine, and sufficient laboratory work to give students skill in adjusting and operating. It is contemplated to hold schools immediately after or prior to the one-day grain standardization schools, directed by the federal department's bureau of markets.

Necessity for practical education of American thrashermen was brought out strikingly by results in Minnesota last year recording the normal waste of grain in thrashing. Comprehensive tests, which included the work of the more than 6,500 machines in the Gopher state, showed that the average avoidable loss in thrashing wheat was 1.69 bushels a day, worth approximately \$9.64; while the avoidable loss in thrashing oats was 9.1 bushels daily, worth then \$5.46. Some of the separators wasted as much as 50 bushels of wheat a day, worth, on the basis of the October market, \$103. Twenty-five per cent of all the machines tested in Minnesota showed an avoidable loss, due to the machines being out of repair or improperly adjusted, of 15 bushels a day. Therefore, Minnesota today is a staunch advocate of teaching thrashermen the three R's—running, repairing and readjusting their thrashing outfits.

EXPERIENCE OF OWNERS

(Prepared by the United States Department of Agriculture.)

Help for American farmers in answering the question "Shall I Buy a Tractor?" has been provided by the United States department of agriculture in a number of publications which give the experience of users in a number of states. These bulletins, which may be obtained free from the department at Washington, are:

- Farmers' Bulletin 963—Tractor Experience in Illinois.
- Farmers' Bulletin 1004—Gas Tractors in Eastern Farming.
- Farmers' Bulletin 1035—The Farm Tractor in the Dakotas.
- Farmers' Bulletin 719—An Economic Study of the Farm Tractor in the Corn Belt.
- Department Bulletin 174—Farm Experience With Tractor.

Toad is Gardener's Friend.
The common toad is the gardener's friend, because he lives upon the small insects that trouble the garden crops. A few toads in the garden will help keep it free of insects.

Careful With Poison.
Receptacles containing poison bait should not be left around where children, live stock and chickens will have access to it.

BRYANTSVILLE

Miss Mayme Ballard spent Monday in Lexington.

Several from here attended the S. S. Picnic Friday at Dix river.

Mrs. Owey Moreland and son are visiting friends at Georgetown.

Miss Margaret Woolfolk was the guest last week of Miss Mayme Lee Ballard.

Miss Marie Coy of Madison was a guest last week of her aunt, Mrs. R. I. Burton.

Several from here have been attending the Chautauqua in Danville this week.

Mrs. Florence Ballard is at home after spending several days at Crab Orchard.

Master John Campbell King of Louisville is spending the week with Jack Williams.

Miss Helen Young who spent the last year in Panama, has been visiting Mrs. W. H. Swope.

Mr. and Mrs. Mershon of Corbin, were the guests recently of Mr. and Mrs. M. O. Kennedy.

The farmers of this vicinity have been quite busy the past week, getting their wheat threshed and cutting hay.

Miss May Johnson and brother, Mr. Herbert Johnson of Hamilton Ohio, visited Miss Mary Belle Halcomb recently.

Mrs. W. J. Hogan went to Lexington where she was called by the illness of her daughter, Mrs. W. T. Woolfolk.

Mrs. B. C. Rose was hostess at an elegant dinner Thursday evening in honor of Miss Marguerite Woolfolk, of Lexington.

Mr. and Mrs. A. B. Swope and Mr. and Mrs. C. C. Becker motored to Mackville Sunday to spend the day with Mrs. J. H. Peters.

Mrs. Sam Deatherage and daughters, Misses Valinda and Martha, of Richmond, Mrs. B. B. Montgomery, of Paint Lick, visited Mrs. J. W. Bryant Tuesday.

Please call at my office in the Court House and list your taxable property for this year, as the time is fixed and limited by the Law. DO NOT PUT THIS OFF.

A. T. SCOTT,

Garrard Co. Tax Commissioner.

Mrs. E. H. Ballard, Miss Mayme Ballard, Miss Marguerite Woolfolk, of Lexington, Mr. and Mrs. J. Hogan Ballard, were the guests Sunday of Mr. and Mrs. E. H. Ballard at Stanford.

Mr. Edwin Wylie had the misfortune to break his arm last week while trying to crank a Ford car. He is getting along nicely and his many friends are hoping for his speedy recovery.

Misses Lucille Moore, Ada Lee Morgan, Sara Catherine King, Evelyn Campbell, Mrs. F. L. Campbell and Mrs. J. C. King, all of Louisville, were dinner guests of Mrs. J. C. Williams Wednesday.

Rev. G. S. Conant and family have returned from Columbus Ohio, where they attended the Centenary. They made the trip in their car. Rev. Conant will fill his regular appointment at the Methodist church Sunday morning and evening.

Dr. B. C. Rose had the misfortune to have his barn burn Saturday night about 12 o'clock. The origin of the fire is unknown. The barn and all contents were completely destroyed. The greatest part of the loss being two "Ford" Sedans. There was no insurance, either on the property or the cars.

Mrs. J. Hogan Ballard entertained about twenty friends at a very delightful "Lawn fete" Friday evening. A most tempting lunch was served and miniature American flags were given as souvenirs in honor of Independence Day. Later in the evening Miss Amy Daves entertained the guests with some beautiful violin selections.

French Port Regains Trade.

While Havre was still young the seafaring men of Honfleur conquered Newfoundland, founded Quebec and established numerous trading posts in India. Much of the town's commerce was gradually absorbed by Havre. At the outbreak of the great war, however, Honfleur had a prosperous export trade with England in dairy products, fruits and vegetables, and a considerable quantity of lumber was imported direct from the Scandinavian countries.

Lake of Sulphate.

A lake near Biggar, Saskatchewan, not about three hundred miles north-west of Regina, has been found to be saturated with sodium sulphate, and no deposit under the lake and alongside the edge to be nearly 97 per cent pure sulphate. The mineral is used extensively in the manufacture of sulphuric acid, in photography and other industrial purposes. The lake occupies an area of about two hundred acres. The edge is muddy, but on being down a solid bed of mirabilite crystals is found.

Gov. Gardner Sees

Thrift's Opportunity.

Missouri Chief Executive Thinks the
Chance To Build Prosperity's
Foundation Never so Good.

A wholesome and much needed lesson has been taught the American people by the government in the various loan and thrift campaigns which have been launched within the past two years.

The War Savings Stamp Campaign should appeal especially to the salary and wage earner, man and woman, girl and boy, as an incentive to saving and investment. The War Savings Stamp affords the readiest means of investment and the most frequent and largest returns in interest. As a boy I would have hailed with delight such an opportunity to invest my small earnings.

As a word of business advice to the American boy and girl, I would say: put out your earnings, save something each week and make your savings earn money for you by investing them in War Savings Stamps.

The principles of thrift is the foundation of character.

Save while you can and you'll not need when you can't.

Thrift is one of the cornerstones of which manhood must be constructed.—Henry Ford.

coal.

W. J. ROMANS.

HESSIAN FLY IS VERY INJURIOUS

Another Outbreak of Pest Is Expected, Perhaps Within Next Few Months.

CAPABLE OF GREAT DAMAGE

Insect Feeds Chiefly on Wheat Plant and in Smaller Measure on Barley and Rye—Straws Break and Fall Before the Harvest.

(Prepared by the United States Department of Agriculture.)

Knowledge in possession of experts of the United States department of agriculture leads to the belief that the Hessian fly, the worst enemy of wheat, has begun gradually to increase. The percentage of infestation, according to the fall count, showed a distinct increase over that of last year. The principal controlling parasites are apparently absent or very scarce, particularly in the middle West. Another outbreak of the pest is expected, perhaps within the next few months. The accompanying illustration, which is being distributed by the department as a poster, presents the means of combating it.

Among insect crop pests in the United States, the Hessian fly stands first in evil reputation and possibilities. In bad years, hundreds of thousands of acres of wheat may be totally destroyed or the yield reduced as much as 75 per cent by this parasite.

Named for Mercenaries.

The Hessian fly is not a native of America and nobody knows whence it came or how. It was noticed in 1779 on Long Island, N. Y., in the vicinity of the place where Lord Howe's army, largely Hessian mercenaries, had camped three years before. The popular belief was that the Hessians had brought the insect over in the straw used by them as bedding on board ships. Thus came the name—and that guess is as good as any as to how the fly got here. All that can be authoritatively said is that it arrived from some transatlantic country some time after the middle of the eighteenth century.

The Hessian fly is one-tenth of an inch long, of an obscure dark color, and appears much like a very small mosquito. It lays a glossy red egg one-fiftieth of an inch long, from which is hatched a maggot slightly smaller than the egg. This transforms into

Means of Combating Hessian Fly.

a pupa that appears like a flaxseed and is so called. From the flaxseed the adult fly emerges. Here are four forms so extremely unlike as to be confusing to any except the expert entomologist.

The fly usually deposits its eggs in grooves on the underside of the leaves of wheat. The larva, shortly after hatching, makes its way down the leaf and behind the sheath, continuing in young wheat to the roots of the plant. In older wheat it is able to go only to the joint below. Larvae are frequently so numerous as to be packed one against another and overlapping. Two generations a year are produced. Overwintering is accomplished in the flaxseed stage.

Destructive to Wheat.

The Hessian fly feeds chiefly on the wheat plant, and in a smaller measure on barley and rye. The oat plant is immune. The effect is that if infestation begins while the wheat is young, the plant grows without stem and becomes a mere mass of overgrown leaves. If infestation comes after jointing has begun, the straws break over and the wheat falls before harvest.

The distribution of this pest includes North Africa, western Asia, all of continental Europe, the British Isles, New Zealand, and portions of the United States and Canada. In the United States its range extends from the Canadian border as far south as northern Georgia, and west to western Kansas, and the middle of the Dakotas. It includes, also, a narrow strip to the Pacific coast from Puget Sound to a point half-way down the California coast.

Kill Canadian Thistles.

Frequent cultivation will help kill a patch of Canada thistles.

Will Pay Big Interest.

Deposit the manure in the soil and it will pay big interest.

PREVENT INJURY BY ARMY WORMS

Important That Pest Be Discov-
ered Before Crops Have Been
Seriously Damaged.

EXAMINE MEADOWS CLOSELY

Grass or Grain Should Be Carefully
Inspected to Detect Presence of
Caterpillars—Poisoned Baits
May Be Used.

(Prepared by the United States Depart-
ment of Agriculture.)

Watchfulness is the key to success
in cases of invasion by army worms,
which are young of certain moths or
millers that fly only at night. The
eggs from which the army worms
hatch are laid commonly on grasses
or grasslike grains and the tiny cater-
pillars, upon hatching, feed for several
days near the ground, hidden by over-
hanging grasses or grains and thus
may escape notice until nearly full
grown, by which time they have be-
come widely distributed over the in-
fested fields.

Upon the discovery of the pest in its
younger stages depends very largely
the possibility of stamping out infes-
tations before serious injury to crops
has occurred. Meadows therefore
should be examined frequently, particu-
larly those planted to timothy, blue-
grass, wheat, and especially millet, to
discover the young worms.

If the infested spot be small, the grass
or grain can be mowed off and straw
scattered over the spot and burned,
thus destroying the worms. If the
caterpillars have become distributed
over a considerable area, this can be
marked off by stakes and the crop
sprayed heavily with a solution of
paris green at the rate of one pound
to 50 gallons of water, or of arsenate
of lead at the rate of two pounds
of the paste or one pound of the pow-
der to 50 gallons of water.

Poisoned Baits for the Army Worm.

Poisoned baits have long been used
as a means of destroying the nume-
rous species of cutworms and also the
army worm. An efficient bait of this
kind may be prepared and used as fol-
lows: To 50 pounds of wheat bran
and one pound of paris green or two
pounds of powdered arsenate of lead;
add the juice of one-half dozen or-
anges or lemons. Then bring the

mass to a stiff dough by adding low-
grade molasses or sirup, preferably
molasses, and scatter the mixture
broadcast in small pieces throughout
the infested field.

In case the worms are not discov-
ered until they have begun to travel
in a mass, usually they can be destroy-
ed by furrowing or ditching complet-
ely around the infested area.

Summary of Control Measures for the Army Worm.

1. Watch fields of growing grass
and grain carefully, especially the
meadows, during the spring and early
summer months, to discover the army
worms before they become full grown
and spread over the entire farm.
When the worms are discovered at
work, do not lose a minute, but attack
them vigorously by means of the mea-
sures outlined in foregoing paragraphs.
2. Poison them by spraying crops
not intended for forage with one
pound of paris green to 50 gallons of
water, or with two pounds of pow-
dered arsenate of lead to 50 gallons
of water. In case the paris green is
used on tender plants, like corn, add
two pounds of freshly-slaked lime to
50 gallons of the mixture. This is to
prevent burning the tender plants.
Where spraying is not practicable,
the use of the poisoned-bran bait al-
ready mentioned is strongly recom-
mended.
3. In case the worms are crawling
in a body, surround them with a fur-
row or ditch and crush them with a
log drag as they fall into it.

JULY

Clearance Sale

Beginning Now and Lasting to August 1st

Prices Slashed on These July Bargains. Many Items Less
Than Cost of Raw Material.

\$3.00 Ironing Boards **\$1.50**
One Lot Mens Dress Shirts, slightly soil-
ed only **50 cents.**

MONEY.

Sanders Variety Store.

Lancaster, COY S. SANDERS, Prop. Kentucky.

HER MISTAKE

By MILDRED WHITE

(Copyright, 1919, Western Newspaper Union)
Janey sat a long while with the let-
ter in her hand. In fancy she was
going over that long blissful time
since she had met Robert and the
tenor of her life had been forever
changed. Before that, it was an un-
eventful routine.

But after Robert's advent, unrest
had stirred within her, and dissatis-
faction with life's simple homeliness.
Robert Tabor, city business man, had
bought as an investment, the great
farm near Janey's home, and when
the caretaker had been duly installed,
Robert Tabor came out to look the
place over. So pleased and interested
was he, that he lingered for weeks,
seeking and finding hospitality in
Janey's home.

It had never been her opportunity to
hear at first hand of remote wonder-
ful parts of the world, for this en-
gaging man from the city had traveled
and learned much. It was a never
ceasing delight to ride over the farm
lands, in his swift running car, or to
drive at his side in a light carriage
through the narrower paths.

Janey's guardian aunt was quite
willing that this should be so, she
had no wish to keep Janey forever at
her side. All at once Janey had been
ashamed of the simple cut of her
home-made frocks, her lack of knowl-
edge of the ways of the great outside
world.

"I want to go to the city," she con-
fided to her new friend, "I want to
learn to be--like them."

"Clothes you mean?" Robert Tabor
had asked, amused.

"Clothes, manners, everything,"
Janey declared.

The aunt, much persuaded, arranged
with an old friend in the city to have
Janey visit her there, and Robert--as
both now called him--continued kind
with his attentions. In his care
Janey visited restaurants, opera, thea-
ters; with him she had driven through
the beautiful parks.

"Oh! how I love it all!" she said.

Home seemed very dull afterward.
Robert's visits to his farm were the
only bright spots, and as fall drew
near and these visits threatened to
cease, Janey grew wan in apprehen-
sion.

With the harvest moon looking down
upon them, glorifying their radiant
faces--Robert had asked Janey to
marry him and she had consented.

Robert wanted her, he longed for
her and despotism held him
tied in the city. Would she come for
a visit to his married sister's home?
Would she come?

In a fever of joyful anticipation
Janey rushed to her aunt's room to
begin preparation. Robert was pale
and worried looking when he met her
at the station. Absently he glanced
over the modish suit and hat which
had cost her aunt a forbiddingly ex-
travagant price.

In the brilliant gathering which his
sister generously arranged for Janey
her fear grew, at his gloomy abstrac-
tion. This taciturn man was a differ-
ent person certainly from the joyously
enthusiastic master of the farm. And
Robert's sister had assured Janey
that she need have no anxiety on
the score of adjustability.

"You seem to have grown up among
us dear," she said.

At the hotel dinner, smiling into
her lover's eyes across the roses help-
ed between them, Janey saw a shadow
there.

"You like all this, don't you?" Rob-
ert asked.

"So much," she agreed, ever eager
to please.

Futilely she asked herself each night
in what she had failed for her fiance
seemed to grow more distantly ab-
sorbed. Suddenly Janey longed with
homesick yearning for the real at-
mosphere of the country she knew, for
the long walks through the silent
places where she could think serious-
ly or find herself again. For Janey
realized that her life of late had been
but pointless effort to learn the part
she would be expected to play in the
future, and in sickness of heart she
wondered if she would be able to car-
ry that weary part through with Rob-
ert always unappreciative at her side.

Frankly but with a tremendous catch
in her voice, Janey told him one day
her problem:

"I don't seem to fit in Robert," she
said, "no matter how hard I try. I'm
a disappointment to you, I feel it.
Take me back to the quiet place that
I best know, and leave me there."

Unbelieving, her lover stared into
her face.

"But you used to tell me," he said
"that you longed for the life of a city!
That is why, after I had bought the
farm, intending to make it my head-
quarters, that I returned again to the
business world, for your sake, Janey,
because you said you loved gayety.
My youthful years have been crowded
full of work and care. It was my
dream that in early success I might
find leisure, again to enjoy those
things that I loved as a boy. But
without your presence I cannot now
enjoy anything.

"Could you be happy with me out
there Janey? When tired of fields and
meadows, we would travel. Could you
go back with me dear, to the farm?"

Through tears Janey smiled at him.
"Why Robert," she said, "it will be
just like going straight back to Para-
dise."

In the 48 states of the Union there
are 2,980 counties.

WOLF TRAIL.

Miss Eunice Stotts spent Thurs-
day night with Miss Jessie B. Ray.

Mr. and Mrs. Elijah McMillian en-
tertained a host of friends Sunday.

Master Lonie Masters spent a few
days last week with Master Elmer
Ray.

Quite a number attended the fun-
eral of Mrs. Marion Brown at Buck-
eye Monday.

Mr. and Mrs. Mat Folger of Som-
erset are with Mr. and Mrs. Walter
Fain this week.

Mr. and Mrs. Frank Land enter-
tained a number of relatives and
friends Sunday.

Mrs. Willie Masters of Madison
are visiting her sister, Mrs. Jesse
Casey this week.

Mrs. Powell Dailey and daughter,
Miss Bert were guests of Mrs. James
Land Monday afternoon.

Mr. and Mrs. Fred Howard and
children of Madison spent the week-
end here with relatives.

Mr. Johnny Mitch Murphy of Mad-

ison county made a recent visit with
Mr. and Mrs. John Dailey.

Mr. Harmon Teater and daughter
Miss Myrtle were Sunday guests of
Mr. and Mrs. Allen Teater.

Mr. and Mrs. Forrest Stapp and
children spent Sunday afternoon with
Mr. and Mrs. Clem Murphy.

Mr. Tom Price who has just return-
ed from France spent a few days last
week with Mr. Elbert Teater.

Mr. and Mrs. Wilbert Dailey and
son and Miss Jessie B. Ray were in
Lancaster Saturday afternoon.

Mrs. Mose Ray and two sons and
daughter, Miss Jessie B., spent Friday
with Mrs. John Wesley Dailey.

Mr. and Mrs. James Land and Mr.
Coy Price and children motored to
Buckeye Saturday afternoon.

Mr. and Mrs. Walter Casey and
children spent the week end with her
parents, Mr and Mrs. W. T. Moberley.

Mr. and Mrs. Wilbert Dailey and
son Harrison Lillard were guests of
Mr. and Mrs. Harmon Davis Sunday.

Mr. and Mrs. Lewis Teater and
handsome baby were the week end

guests of Mr. and Mrs. Raymond
Davis.

Mr. and Mrs. Ben Humphrey and
grand-daughter from Jessamine coun-
ty spent Sunday with Mr. and Mrs.
Lewis Murphy.

The "Negro Minstrel" which vis-
ited this place Friday and Saturday
night was quite a success. All were
well pleased with it and especially the
song the colored girls sing when they
comb their hair, "The Road is long
and rocky, but it wont be rocky long,
Believe me".

Where the Folly Lies.

It is hardly ever foolish to do a
thing because we want to do it. The
folly lies in doing a thing because
other people think we ought to want
to do it, and we do not.

INTERESTING ITEMS TAKEN FROM THE BAPTIST VISITOR.

WHO'S WHO?

A new preacher in town? Yes! James Russell Strother is his name. Come around to the parsonage and hear him.

Some of our oldest members are our most faithful members. Young people become more faithful, or hurry up and get old.

Eugene Cochran has gone to Kansas City for the summer. We will miss Eugene, but we hope he will have a very enjoyable time.

Miss Mattie Adams and Miss Faye Acton, both of Lexington, and members of our church have been with us recently and we delighted in having them.

Carl Acton is back with us from the army and his sister Miss Florence is back from Georgetown College. We are indeed glad to have them in our midst again.

Miss Viola Beagle, daughter of one of our former pastors recently honored us with a little visit. Come again Miss Viola and bring all the rest of the family.

We learn that Brother Clay Sutton has sold his farm. Well that is alright, provided we do not lose Mr. and Mrs. Sutton from our membership. We would count that a sad loss indeed.

We have lost Miss Allie Hendren, but we have gained Mrs. Wheeler. Congratulations Miss Allie. We wish you much joy and happiness—provided you do not leave us. Your recent absence has been atoned for, by the presence of your brother Owen. We wish we could have both of you regularly and also Mr. Wheeler.

Our ambition and prayer is to enlist every Baptist in our vicinity. That should not be hard for us to realize as every unenlisted Baptist knows he should be in our church. His sense of loyalty to Christ demands that he unite with the nearest Baptist church.

B. Y. B. U.

This is an organization very near and very dear to the heart of the pastor. Even though he is Daddy, he is not so old himself, and loves to work with the young people. Those letters, B. Y. B. U. are full of meaning. All Baptist Young People Utilized for God. Our motto is a splendid one. "Loyalty to Christ". Young people if we will, we can build up a great union and render sweet and useful service to our master. In Miss Laverne Dickerson, Elizabeth Estes, Harry Bratton and Hugh Mobley, we have splendid program leaders. There are many fine young men and young ladies in our church who can render service, if enlisted and interested. It is our duty to interest them.

We should take Christ with us in our social life as well as in our religious life. In fact the two should be identical. There is such a thing as a Christian entertainment, a Christian social or a Christian picnic. We are planning some of these things for our B. Y. B. U. We all want you to have a good time and in the right way.

BREEZY BITS.

Some members have already paid all their pledges. That is splendid! Some pay regularly each Sunday. That is fine!

Some have made pledges and paid nothing. That is bad! Some have neither pledged, nor paid anything. That is worse!

The pastor goes on record as having said, he has never labored with a better, more sympathetic, or more responsive people than his church at Lancaster.

"Did that employment agency you tried make any real effort to satisfy you?"

"Well yes! I asked particularly for a cook who could make a salmon loaf, and they sent me one that could make anything loaf."

Our Baptist brethren of the North have adopted a budget of \$100,000,000 to be raised in five years. This makes a total budget of \$175,000,000 for the Baptists of the United States.

SUNDAY SCHOOL.

No, it is not dragging. You may be, but the Sunday School is not. If you are sleepy on Sunday morning, come to Sunday School and we will wake you up. If you are tired on Sunday morning, come to Sunday School and the Lord will give you rest. If you are not interested in Sunday School, come, and we will interest you.

The superintendent wielded a mighty sword last Sunday and spoke words of deep meaning. It is true our enrollment is fine, but the burning question is, what about our attendance? Our attendance is only about 40 per cent of our enrollment. In the words of an Indian "That hadn't ought ter be." The trouble is that you do not attend. Help us to improve our attendance.

Our superintendent is very insist-

ent that everyone bring a Bible to Sunday School. That is right. The Bible is the book we are studying. Let us make our Sunday School a real Bible school.

Christian Education is the foremost need of the day. That is why the Sunday School and the Christian College play such an important part in denominational life. If you are contemplating going to College, go to a Baptist institution. We have some of the foremost Colleges in the land, and you do not have to go far to find a good one.

BAPTIST CHALLENGE.

The \$75,000,000 to be raised by Southern Baptists within the next five years will be divided as follows: Educational \$20,000,000 Foreign Missions \$20,000,000 Home Missions \$12,000,000 State Missions \$11,000,000 Ministerial Relief \$5,000,000 Orphanages \$4,700,000 Hospitals \$2,125,000 National Memorial \$175,000 Kentucky's quota is \$6,500,000. This is a task that challenges the heroic in every soul redeemed by the blood of the Son of God.

"Johnny, why, did you laugh?" "Teacher I did not laugh. I was only smiling and the smile busted."

WHAT'S WHAT?

Let me introduce you to our newest members—Mr. and Miss Sowder. Both were formerly members of the Fairbournville church, and were very active in the young people's work of that city. We delight in welcoming them into our fellowship. There have now been 15 additions to our church. It is time for us to turn the figures the other way and make the number our our additions 51.

The people of Lancaster are proud of their new post-office. It always helps a town to have nice public buildings. The churches of the town should also be just as nice as the best public building of the town. It is no secret that Lancaster needs some new church buildings, and no church needs a new building more than we. Our Sunday School, B. Y. B. U., and church work is being hindered by an antiquated building. At present we do not have adequate facilities for our work.

The pastor hopes to soon be in your home as well as in your prayers and in your heart. Conditions have been so for several weeks that he could not do any visiting; but he hopes to be able to make a new start soon, and make up for lost time. He, as pastor, realizes that he should visit you in your home, and is going to do so. Do you realize that it is your duty as a member to see him every Sunday at church? Let each realize his, or her, specific duty.

We are not prepared to make a definite announcement in regard to our proposed revival meetings. It is probable that Dr. Theodore N. Compton will conduct the meeting, and that the time will be about the last of September or first of October. As yet we have received no tangible information in regard to a singer. The success or failure of the meeting depends upon you. You be ready for a revival in heart, mind, and soul and then we will have a great meeting in our church.

GIVE—your heart to Christ. Your talents to God. Your service to the Master. The place to serve is in the Church. The church in which to serve is the church of your denomination nearest you.

Great Value of Courage.

It is not clearly understood how valuable is the adjunct of courage in the man or woman, nor that, if accompanied by good judgment it is the most valuable of business assets.—John Brisbane Walker.

Telephone Tattle.

Thieves and beggars have a "cant" language of their own. When a burglar uses the phrase, "struck by lightning," he means that he was arrested by the police whilst engaged on his little job, through information conveyed through the telephone.

Egyptian Saw.

The saw appears to be the earliest tool in Egyptian history. It was found first in the form of a notched bronze knife, 5,000 years before the Christian era. There are no dated specimens until the seventh century before the Christian era, when the Assyrians used iron saws.

His Favorite.

Brother was attending a party at which the refreshments served were ice cream and cake. The hostess saw that brother wasn't making much headway with the ice cream, so asked him if he didn't care for it. "Oh, yes," he answered. "Ice cream is all right; but turkey is my favorite."

Powdered Eggs.

China is one of the principal sources of dried and powdered eggs. Manufacturers of prepared products in this country are said to be interested in the possibilities of dried and powdered eggs, especially in view of the increased use of such products in ready-mixed flours and in bakeries.

Wolsey's Disinfectant.

Whenever Cardinal Wolsey granted an audience to the people, or whenever he went anywhere where he was apt to have to mingle with a crowd, he carried an orange that had been especially prepared for him by removing the pulp and putting a sponge soaked with disinfectant and sweet smelling spices inside it.

51 ACRES

"Gamp Dick" LAND

Six miles from Lancaster on Lexington pike at

AUCTION

WEDNESDAY, JULY 23rd

10:30 A. M.,

This Sale will last but 30 minutes, so be on hand promptly. This tract lies between the Robert Rankin and Ed Perkins Farms—is improved with 7 room dwelling, tobacco and stock barn, plenty of shade and fruit trees and everlasting living stream of water.

Owing to the wide pike frontage we are authorized by the owner, Russell Brown, to sell in two tracts of about 15 and 35 acres each. Remember: That, small improved tracts on Lexington Pike are seldom offered for sale. THAT, this tract is most admirably situated. THAT this tract is a proven producer. THAT, if you fail to attend this sale you will wish you had.

WATCH LEXINGTON PIKE TRACTS INCREASE IN VALUE.

Terms announced day of Sale.

D. A. THOMAS REALTY AGENCY.

MEN WANTED - FOR THE - AIR SERVICE

If you are ambitious you can not afford to overlook the opportunities in the Air Service.

The Government is giving FLYING TRAINING to ENLISTED MEN, as well as a complete course in Aviation Mechanics, Fabric Work, Rigging, Woodworking, and Motor Mechanics.

This is an opportunity of a lifetime. Aeroplanes have come to stay. There will always be a big demand for skilled aeroplane pilots and Mechanics. NOW is the time to learn at the Government's Expense. HERE ARE SOME OF THE REASONS WHY YOU CAN NOT AFFORD TO OVERLOOK THIS OPPORTUNITY TO JOIN THE U. S. ARMY IN THE AIR SERVICE, AERONAUTICS DIVISION.

1. Highest branch of the Service.
2. An enlisted man has the opportunity of attending a Training School where a three months' course is given in airplane construction, repair of and the upkeep of airplane motors, and woodworking. In view of the fact that the airplane will without question be used to a very large extent commercially, the knowledge gained while in the Army could be put to very good advantage in civil life should the soldier desire to return to civil life after serving with the colors for three years.
3. Attention is also brought to the fact that the average salary for men between the ages of 20 and 25 years of age equals about \$885 per annum. Compare this with the pay and allowances in the Army, figuring as follows, which is conservative:

Private—Pay per annum.....	\$360.00
Room and Board—\$40.00 per month.....	480.00
Clothing.....	170.00

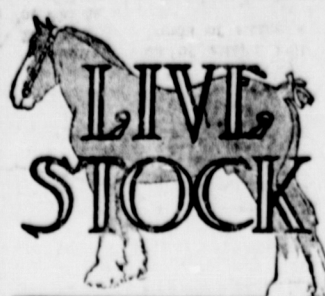

Sergeant, figuring on same basis as above.....	\$1,010.00
Sergeant, first class, figuring on same basis as above.....	\$1,178.00
M. S. E., figuring on same basis as above.....	1,262.00
M. S. E., figuring on same basis as above.....	1,610.00

After having completed a course at school a soldier has the opportunity of taking an examination for appointment as Aviation Mechanic, which when successfully passed gives an increase of 50 per cent per month to salary.

In addition to the above, free entertainment and athletic events are held, free medical attention, excellent opportunity for travel. You also have an opportunity of taking flying instruction, and after the prescribed course has been finished, which generally requires three months, you are entitled to an additional 50 per cent increase in pay. This additional pay does not apply, however, if you have been appointed to the grade of Aviation Mechanic.

Recruiting Officers and experienced aviators will be in Lancaster every day for the next two weeks. Be sure and see the exhibition of flying every day during that time.

ACROBATIC STUNTS AND ALL KINDS OF EXCITING AND THRILLING FEATS WILL BE PERFORMED BY TRAINED AVIATORS OVER LANCASTER NEXT SATURDAY, JULY 12th.

LESS HOG-CHOLERA LOSSES

In 1918 Death Rate of Swine From Disease Was Placed at 42.1 Per Thousand.

(Prepared by the United States Department of Agriculture.)

Since 1913, when the United States department of agriculture began work to control hog cholera, the dreaded disease has become less and less destructive each year. A force averaging 165 federal veterinarians has been maintained, working in co-operation with state authorities in charge of quarantine and other regulatory measures necessary for the success of control work. During the fiscal year 1918 more than 5,000,000 hogs were inoculated with hog-cholera serum, and more than 2,200 farms, found to be infected

There is No Profit in Unhealthy Hogs—Animals Kept Under Clean Conditions, as on Good Pasture, Are Better Able to Resist Cholera and Other Diseases.

With cholera, were cleaned and disinfected under supervision of the department veterinarians.

Altogether, representatives of the department visited more than 15,000 farms to investigate reported outbreaks, to apply preventive measures and to clean and disinfect premises. How great a menace hog cholera has been to the nation's swine industry may be judged from the accepted estimate that 90 per cent of hogs lost from all ailments die from cholera. In 1918 the death rate of swine from disease was placed at 42.1 per 1,000. Thus the loss was slightly above 4 per cent for the United States, the lowest on record, according to the department's figures.

HOG RAISING IN THE SOUTH

Many Southern Farmers Growing More Animals and of Larger Type—Noticeable in Georgia.

(Prepared by the United States Department of Agriculture.)

An important result of hog-cholera control work which has resulted in a steady decline of the disease, has been the stimulus given the development of swine raising in the South. With other activities of the department in this line, the assurance given to Southern farmers that hogs can be produced without fear of losses from cholera has encouraged growing not only larger numbers of animals but also better types. This has been noticeable particularly in Georgia. A few years ago that state purchased about 40,000,000 pounds of pork more than it produced annually. But efforts for the control of hog cholera have gradually extended over the entire state, with resulting confidence in hog raising. By 1918 Georgia was producing pork enough to make shipments to outside points besides supplying a large number of hogs to local slaughtering establishments. Similar progress has been made in Mississippi, Alabama and Florida.

LIVE STOCK NOTES

There should be more calves on farms.

A satisfied cow is probably a satisfactory cow.

More cows should be kept on the average farm.

Cows without salt lose flesh and finally break down.

Comfort is as essential to a cow as to any other worker.

When buying a grade cow it pays to select one from a pure-bred bull.

A number of calves die every year on account of the disease known as scours.

In stormy weather, when mud is too frequent, the cows will take a great deal of scrubbing.

One hundred tons of silage will feed 25 cows 100 pounds of silage a day for 200 days.

Any man who keeps ten head or more cattle will find a silo an economic equipment on his farm.
